**BP** sale scaled down to 5%

\*\*\*200

### By Nicholas Colchester and Philip Rawstorne

THE BRITISH Covernment bas guerrilla alliance retreated last scaled down its planned sale of night from its hard-line opposi-shares in British Petroleum to S tion to the British draft per cent of the share capital. The Treasury announced this last night in a statement explaining how the Government would raise film in this financial year by selling Covern-ment assets ment assets. The Treasury said that tha

THE

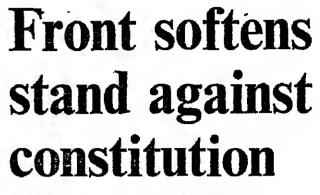

tion is clarified."

BP sale would raise £200m to \$300m. The BP share price moved sharply upwards yester-day by 30p to 362p on the news that less stock was to be offered. At this level, 5 per cent of the company would sell for £280m.

The Government's proposals came under furious attack from Labour leaders last night. Dr. David Owen, Shadow Energy Secretary, said be intended to ask the Stock Exchange Council to rule wbether the sale of BP shares was a breach of its own regulations. "1 believe the salc of the Government's holding is not in the interests of the sbare-holders in general," Dr. Owen said.

No details on the timing. mechanics or price of the sale were given yesterday. The shares in BP will come from the was raising the land issue as a matter of substance, in which Covernment's direct bolding, which will be reduced by the sale to 25.9 per cent. Together with the bolding of the Bank of case its demands could still England, which will not be affected, the Government will control about 46 per cent of BP after the disposal.

The balance of the £1bn will be raised through the advance sale of crude oil from the British National Oil Corporation, which will raise between f400m and £500m, the sale of new town assets and public sector land worth £100m to £150m, and the sale of various boldings of the National Enterprise Board for £100m-£150m. When Shr Geoffrey Howe, the Chancellor, announced his plans to sell assets in his Budget speech on June 12, he said that the biggest contribution to the total of £1bn would be derived

# Timely Olympic boost for Switzerland Swiss to

DURING NEXT year's Olympic Games in Moscow and Lake Plecid. millions of television again see the words "Swiss timing" repeatedly flash on to their acreens.

2

Already, the Swiss watch Already, the Swiss waten companies involved are running large internstional sdvertising campaigns proclaiming their role as official time-keepers.

Swiss companies can do with the Olympic prestige. The industry has come under pres-sure in recent years from cheaper Japanese and other Far East manufacturers.

Switzerland's watchmakers have been employed for the timing of all Summer Olympics since 1920 and all winter Olympics since 1936—with the exception of those held in exception of mose action in Japan—as well as a long list of regional games, world chsm-plonships and individual record attempts.

This kind of activity has long ceased to be profitable since time-keeping has been out of the stopwatch phase for almost half a century. It now calls for some pretty costly advanced electronics.

The increased costs have meant that no one Swiss company now gets the Kudos. It is sbared among a number of Swisa concerns, as well aa some West German ones.

By the Mexico City games of 1968, Omegs, which for decades had been the higgest name in Olympic time-keepiog, was feeling the expense. Four years later, in Munich, it co-operated with the West German Junghans concern and with its arch-rival Longines. The two Swiss companies,

which had already collahorated in a smaller way in the Inns-bruck winter events of 1964, realised the advantages of coordinating their efforts in this and development efforts in the field and gained the whole- four years preceding the Olym-bearted support of the Federa- pics. tion of Swiss Watch Manufacturers (Fédération Horlogère). The Federation had for years

watchmakers could well do with the fillip the Games will bring.

show the flag abroad. In July 1972, this led to the creation of Swiss Timing Ltd in the wstch making area of Bienne. The Idea was for a number of projects for prestige time keeping in the field of sport. Apart from the advantages of collaboration in terms of research and know-how, the financial pressure on individual watch companies was relieved.

Contributions to Swiss Timing have come from trade bodies, iocluding the Fédération Hor-logère, as well as from the Federal Government, the authorities of the Canton of Berne and the City of Bienne

aod private enterprises like Swissair, the La Neuchateloise Insurance Company and some hanks. Spreading the cost is impor-

tant. Swiss Timing's expendi-ture oo the 197fi games in Montreal and Inosbruck alone amounted to hetween SwFr 10m and SwFr 12m (£3m to £3.fim). This included special research

Althongb it is difficult to now seems to he to improve compute exactly the advantages further the quality of Swlss of involvement in Olympic watches, and to allow makers of

The industry could do with the fillip of a new round of Swiss-timed Olympics. In the first aeven months of this year. Swiss watch exports were down 7.7 per cent against 1978, des-pite the marked rise in sales of electronic timeniesce. electronic timepieces. Between 1974 and 1978, Switzerland's share of total world exports of watches and watch movements

dropped from over 61 per cent to less than 35 per cent. The big groups like Société Suisse pour L'Industrie Hor-logère (SSIH) to which Omega, Tissot and the Longines parent Asuag helong, are trying to weather the storm hy restruc-turing where possible.

SSIH recently announced that it has closed down a small fac-tory producing cheap electronic watches, even though the hoom in electronic watch sales is pre-dicted to continue.

The closure of the Actos Watch Compsny is one sign of the industry's determination to sbake out dead wood. Another indication is the 60 per cent stake hought hy Desco, a mem-her of the powerful Schultess holding company of Zurich, io the family-owned watch-making compaoy Girard-Perregaux 'of La Chaux-De-Fonds.

Girard-Perregaux will continue its operations as hefore. But Desco, which through Schultess has an extensive international trading and marketing network, should give the watch makers a firmer grip on the world market for high-quality watches.

The atrategy of the industry

# **CAMBODIAN REFUGEE CHILDREN:** NNOCENT SENTENCED TO DESPAIR

As you are reading this, thousands of starving Cambodian refugees are pouring across the borders of N.E. Thailand.

An official State of Emergency has just been declared in the area and the only hope of survival for many refugee children is help from Save the Children.

Our paediatric medical team is already working in Thailand and awaits government permission to go to the areas in Cambodia where help is needed.

We have already sent food and medical aid by large to Kompong Som, and will be sending more.

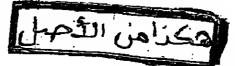

This is the one chance of life for these children and without money from you, it will be denied them. So please, give now - and give all you can.

### Always Save the Children first.

**Oil puts** French trade in deficit

#### By Robert Mauthner in Paris

FRANCE HAD a cumulative seasonally adjusted trade deficit of FFr 6.6bn (about £730m) during the first nine months of this year. But invisible earnings are expected to put the current account in surplus to roughly the same extent as the trade shortfall during this period.

In September, the trade account showed a deficit of FFr 1.8bn, down sharply from the August shortfall of FFr 3.2bn, which was the worst monthly result for three years. M. Jean-Francois Deniau, the Trade Minister, said that the trade deficit for 1979 as a whole was expected to amount to some FFr 10bn, which was the upper

limit of the Government's foreeasts made at the time of last summer's OPEC oil price rises.

France was absorbing the shock of the oil price rises reasonably well, M. Deniau said. but his statement was made be-fore the announcement of the latest increase

A more pessimistic assess-ment of the similar was made by M. Raymond Barre, the Prime Minister, who said in a newspaper interview that modern economies could func-tion properly only on the basis of regular oil supplies and regular oil price increases.

The constant and unpredictable increase in oil prices would inevitably fnet inflation in importing constries, lead to a deterioration in their external ayments and transfer some of their national resources to the oil-producing countries.

France's energy deficit in September of FFr 9bn, some FFr 4bn higher than in the same month of 1978, was largely responsible for the overall trade deficit.

Excluding energy, however, the trade halance was in surplus lished in Czechoslovakia, Mr. last month to the tune of FFr Inosemzev, director of the

that, although their work has been complementary, both were celebrated for espousing different schools of thought on the use of labour in the agricultural sectors of the developing world. Sir Arthur's hasic contention was that the labour market does not work well in rural areasthat the wages of rural labour are, in effect, worth more than their marginal production.

3

Prof. Schuitz, on the other hand, has argued that, if labour is withdrawn from rural areas in developing countries, agri-cultural production falls. He bas cited a number of examples, including the Indian influenza epidemic of the late 1950s, to huttress his case.

Both men, notably Prof. Schultz, have been leading and early exponents of the proposi-Prof. Lewis's opinion, of vial experience of economic policies tion that education in the importance to the growth of and underlying political systems developing world has to be seen developing countries. change

# It's like having a constantly updated FT on your desk at the press of a button.

هكنامه التحل

# Folded.

When you've finished reading this advertisement, take your FT and fold it. Once. Twice.

To quarter size: 8" x 12".

Or, to put it another way, to the size of the front of STC's Business Terminal: Novatel.

Now while size may not be all-important, purposebuilt design is. And so is cost-effectiveness.

STC believes it's less than professional to ask you, when your telephone connects you with Prestel, Europe's most sophisticated business viewdata system, to make do with a converted domestic TV set.

Which is why STC has built its terminal specifically for information retrieval; for both public and private viewdata systems; and for a business office environment.

#### The most functional desktop terminal

You can see by the actual-size picture on this page how compact the STC Novatel Business Terminal is. What you can't see is how simple it is to use – far simpler than, for instance, your pocket calculator.

Nor how easy it is to absorb the information you summon up.

Characters are displayed at desktop viewing size,

monitor-sharp under all conditions.

Even the easy-to-understand keypad can be lifted out to save you having to reach across your desk.

# The most sophisticated business information system

Once again the UK leads the world in concept. Several countries are preparing their plans for national viewdata services modelled on the UK development. The West German Post Office (Bundespost) has already signed up British Post Office viewdata knowhow and software.

The UK Post Office is investing millions in the Prestel service. Already its fingertip facilities can call up over 130,000 'pages' of regularly updated general, financial and business information.

And these are only the public facilities. There's much more, with STC's Novatel Business Terminal.

# STC gives you entrée to private databases

As well as access to the centralised store of Prestel information, the STC Novatel Business Terminal offers a second channel for automatic access to private databases. Organisations with their own computer databases can use the STC Novatel Business Terminal for secure and private access to them. And if you want to set up your own database, STC can help.

What's more, the STC Novatel Business Terminal has provision for recording the incoming information on to a standard audio cassette for later replay.

#### How to find out more about STC's Novatel Business Terminal

The easy way is to call Prestel page 484. But for that you need a viewdata terminal.

So we suggest you write to the address below for a comprehensive brochure and the opportunity, if you wish, to see the STC Novatel Business Terminal in action. Or ask for a demonstration at larger London branches of Ryman.

One thing we promise: it will help your business. And after all, since it fits the FT so well, surely it will fit your desk.

to light

If you're a man of driving ambition, we present the perfect solution: the Lancia Gamma Berlina. A test drive will prove to you or your chauffeur that it is the car capable of satisfying the driving instinct in the most demanding of motorists.

Beneath the bonnet is a powerful 2.5 litre engine which combines with a five speed gearbox to give impressive acceleration, leading to a top speed of over 120mph. While power assisted steering helps the Gamma Berlina handle like a car half its size. The interior is extraordinarily roomy. Thick carpet is fitted door to door. And the seats, complete with adjustable headrests, are contoured,

thickly padded and covered in an elegant cloth fabric.

Naturally there are some impressive executive touches. Like electrically operated windows, a driver's seat that adjusts for both height and tilt, and an adjustable steering column.

Naturally too, there's the renowned Lancia front wheel drive for rocksteady handling and roadholding, and dual system brakes for exceptional stopping power. You might think that such a wellengineered, well equipped car would, like some of its lesser rivals,

you luxury you can afford. (You might tell your financial director, too, that the new 12,000 mile major servicing intervals practically halve the servicing costs.)

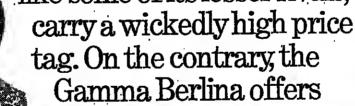

You, or your chauffeur, can test drive the Gamma Berlina at your Lancia dealer. At the same time, ask him about our special leasing schemes. Or if you are eligible to purchase a Lancia free of taxes, contact our Export Department.

### Guyana seeks fund to buy raw materials <sup>1</sup>By Mohammed Hamaludin

8

#### Georgetown

**REARTENED** by tuitial successes at trade fairs in London and neighbouring Surinam, Gnyanese manufacturers bave approached their Government with the idea of establishing a special revolving foreign exchange fund to finance purchases.of raw materials from abroad to service export orders.

Mr. Francis Gobln, presldent of the Guvann Manufac-turers Association (GMA), has explained that there is World Bank interest in such a scheme. The hank may be disposed towards putting np £2m, with a similar amount likely to come from U.S. hanks, he said.

The idea is to be discussed more fully between the manu-facturers and the state planning commission, with the GMA about to begin a survey of the export earnings potch-tial of 30 selected companies over a three-year period. Guyanese participating in

the Impo-Expo fair in London earlier this year brought in orders worth £2m.

Similar results bave accompanied participation in the Surinam trade fair last month in Paramaribo. The main goods heing pro-

msted are wooden forniture. garments. liquor, industrial equipment and processed food

Meanwhile, the Soviet Uninn recently opened its first-ever trade fair in the English-speaking Carbihean. which has featured mainly picturial displays of some 100 Soviet products. especially tractors, agricultural equip-ment, civil aircraft, books, mining equipment. watches, movie cameras, radios, testing and measuring equipment. and optical instruments.

The Soviets bought about £1m worth of Gnyanese alumina in 1977-78.

Prospects for stepping up trade with East Germany will he examined next month when the joint Guyana-German Democratic Mixed Commission holds its fourth meeting, in East Berlin.

Trade between the East Germans and Guyana currently is running at abont £2.5m annually with the Goyanese buying capital and consumer goods, and the Germans buying bauxite, rice, sugar, rum and garments.

plant as part of its programme 10 modernise its industry, AP-

DJ reports. A Ministry of International Trade and Industry official said Chinese aothorities disclosed the plant to a Japanese Government nission visiting China to assess its modernisation projects be-fore deciding whether to provide

loan. The plant capable of refining about 600.000 tons of aluminium a year, will he built in Kwangsi at a cost of some Y20bn (£706m). China is not seeking Japanese finaocial assistance in the construction of the plant, but the Japaoese Government is asking China to provide details since the plant, when completed, will have a considerable impact on the Japanese aluminium-re-

fining industry. Japanese Government officials said the plant will be the second argest after that in the Soxiet

Insurance for houses going up By Eric Short

TWO MAJOR insurance companies, General Accident and Eagle Star, bave announced the first increases in half a century in house insurance premium ratés

The basic premium rate for private houses was fixed at 12-per cent per £100 sum insured (2s 6d in pre-decimal currency) in the 1920s.

General Accident is to lift its rates on November 1-from 124p to 15p per £100 on the normal indemnity contracts and from 15p to 18p on complete replacement (new-for-old)). Eagle Star is raising its rates on January 1, 1980, by the same amount for normal indemnity and from 171

Increases have been expected since the hot, dry summer of 1976 when widespread subsidence claims resulted from the subsoil drying out. Insurance companies have provided subsidence cover, for no extra pre-mium, since 1971 and subsidence

claims in the past three years have cost them about £100m. In addition, snow and icy conditions last winter resulted in a substantial number of burst pipe claims, costing com-panies at least £60m. Finally, there has been a steady increase in the number of claims being made. Insurance companies bave been extending cover to include a variety of minor incidents and the public in general has hecome more claims conscious.

# Foreign holiday boom 'on way'

#### BY ALAN FORREST

TAX REBATES and the have exploited the strengthen stronger pound could lead to a ing of the pound against the foreign holiday boom for the dollar to introduce hulidays in the U.S. at lower prices in UK tourist industry, package pounds than last year on some holiday companies said yestertours." dav.

Cosmos's 1980 brochure in Mr. Roger Heape, marketing cludes the recently-announced chief of Thomson Hulidays. Britain's leading package tour operator, reported that more than 200,000 of its next year's summer bolidays bad been package of 10 days in Miami and four days in New York for £195. Mr. Silver claimed: "We are offering significantly lower prices in every field of bolidaybooked in the first month of making than other companies. sale with 50 per cent of its U.S. In some cases-and not only the programme already snapped up. ## **Newly found Caxton** work fetches £25,000

SOME PREVIOUSLY unrecorded fragments of printing by William Caxton. discovered by Christie's yesterday for £11,000 Sothely's book expert William lection of 15th- and 16th-century hooks helonging to the late Solomon Pottesman, sold for £25,000 at Sotheby's yesterday. The fragments make up a virtually complete copy of an indulsence printed by Caxlon in 1480. They were bought by Quaritch, the London dealer.

The two-day auction totalled £195,448. A first edition of "Summa prima secundae" by Thomas Aquinas made £3,800. An important auction of Con-

tinental porcelain and enamels made f231.835. A large Meissen

dish of about 1735 went for £12,000 and a Sevres dinner service of 1793 for £11,000. An carly Meissen " cremetopf " and cover realised £9,000. Also at Sothehy's a Russian fintlock fowling piece of about 1820 sold for £4.200.

A Maori wood panel door, dating from before 1840, sold at to Entwistle It was the top Ward while cataloguing the col- price in a tribal art auction totalling £142,891.

### SALEROOM

BY ANTONY THORNCROFT

An early Zulu wood figure made £5,500 and a Bamileke wood male figure. £4,500. The top lot in the auction, a Rarotonga small staff god. was bought in when the bidding reacbed £16,000.

A Christie's coin sale made £71,461. A Brazilian gold coin went for £3,100 and the gold medal awarded boxing Thomas Sayers, a contestant in the first international heavy-weight contest in 1860, held in Kent, for £2,100.

Dinosaurs disappeared because they. couldn't adapt to a changing environment. The end of the Cheap Energy Age means that we, too, are now being challenged to adapt.

It's time to take a fresh look at our attitudes to energy - because dinosaurism is a state of mind.

We need to change our habits and adapt our technology to use energy more efficiently. But we should look beyond the narrow view that conservation means throwing improved living standards into reverse.

Certainly, we can do without excesses like big cars for lone drivers; but human wit extends far beyond the 'switch off, turn down' approach. On the energy tightrops of the 1980s, we'll only keep our balance by invention, imagination and initiative.

No dinosaurs.

Invention gives us the techniques to make more of the energy we have.

Imagination sidesteps energy costs: preheats bathwater with a solar panel or takes a shower instead; holds a video conference to avoid a dozen business journeys; puts waste heat from industry to use elsewhere.

Mobil

initiative picks up good ideas and invests in them. Over the past five years, Mobil has saved over 80 million gallons of fuel on its British operations by applying existing ideas, from insulation to computer controls.

If we look around today, we'll find plenty of energy dinosaurs still hunking in our homes, our factories and on the roads.

But if we can rethink our attitudes to energy, we don't have to let prehistory repeat itself.

# **Oil companies give** a winter warning

#### BY RAY DAFTER, ENERGY EOITOR

OIL COMPANIES warn that at this time last year. customers huying products such Petrol sales rose by some 2.5 as petrol, home heating oil and per cent in the first eight fuel oil must he prepared for months, despite a price increase shortages and price rises this of hetween 60 and 70 per cent. -winter.

this lime last year, oil suppliers year-a rate expected to conare concerned that an inter- tinue for the remainder of the ruption in crude oil deliveries year could create shortages February or March.

The industry describes the UK oil supply consition as heing '.there unforeseen are no problems, the huffer of stocks containing 80 days supply should be sufficient to ensure no cutbacks this winter.

Oil companies are, however, warning major customers and petrol retailers that the position could muckly change. Sucoly orobtems could arise if a major oroducer, like fran reduced Its outout significantly, nartleularly if such action mincided with a cuthack in exports hy Saudi Arabia. The shudown of production in one of the North Sea oil fields could have the same effect.

In soile of the Government's drive for greater energy conservation effort oil industry inducte that fuel Sources domand is still ornwing Sales products-other than nerrol-in the first eight months of this year area by 3.5 per cent compared with the same period last year (This growth 2.5 per cent when adjustments at 1-2 per cent higher than price increases.

Petrol demand is now running For although stock levels are at between 0.5 and 1 per cent adequate at least as high as at higher than at this time last Although the iodustry does

not expect to raise oil product prices further this year, there is concern that crude oil exporters may force their hand. It is pointed out that the supply and pricing position is changing almost daily. Refiners are wondering whether Libya and Iran have started a new and unexpected pricing spiral, Libya has raised its oil prices by nearly 12 per cent to \$26,77 a harrel, breaking the maximum level of \$23.50 set this summer by the Organisation of Pet-roleum Exporting Coontries.

Iran has informed customers 15,25 per cent to the Norof increases ranging from some 7 to 14 per cent, although it is managing to keep its prices within the OPEC limit. Eastern.

The oil industry had expected OPEC members to wait until the normat price fixing meeting in Venezuela in December hefore deciding on new pricing levels. It is generally thought that an increase of around 10 ger cent ntight be adopted then. Companies concede, however, that the decision of Iran and Libya might trigger a wave of te\_ls reckoned to he nearer much earlier price adjustments.

What makes these problems so significant is the sheer scale of the co-op movement's operations in the UK. There are some 10.6m customer-members of the society elect a board of directors who run the society.

Each society in turn has a financial holding in the CWS which produces and distributes goods to retail societies on competitive terms.

Both individual societies and the CWS are members-along with other co-operative hodiesof the Co-operative Union, which acts as a national forum for the co-on movement although it has no effective power. This power resides with the individual retail societies.

In total, the co-on movement employs nearly a third of a miltion neonle, owns the hispest fleet of motor vehicles after that of the Government, has some 150 factories at home and abroad. rops more grocery stores than the rest of the supermarket multintes combined and operates retail societies. It must use the sixth largest denosit bank gentle persuasion-which is not and the plnth hissest mutual always heeded.

over of £3.1hn, of which the largest is accounted for by the Co-operative Retail Services (over £400m) and the London Society (£715m). The CWS alone accounts for sales of about £1.7bn-including its importing, manufacturing, wholesaling, hanking, and insur-ing functions on behalf of individual societies. Apart from being the UK's higgest farmer, it also operates the major

Scottish retail society. The CWS's problem is that ln spite of its size and its efficient operating structure, huilt by Sir Arthur during his five-year spell as chief executive, it is con-strained by the dogced indepen-

dence of each retail society. The fact that only some two-thirds of societies' needs are provided by the CWS highlights the fact that some societies nrefer to support outside wholesalers rather than their own operation. It is as though individual Tesco branches could pick

decadc. and choose from where to huy The co-op's share of total their supplies. The CWS cannot impose any retail sales, according to Department of Industry figures, central trading atrategy on to

co-ops did particularly badly, year's president of the Co-op only managing to increase sales Union, made another rallying by a tenth. This was substanti-ally less than the 15 per cent itself up for the 1980s. He

Sir Arthur Sugden, as presi-dent of the Co-op Union two years ago (he thus combined the top two jobs of the co-op movement for a year) made an impassioned plea for pragmatic to co-ordinate the movement's trading strategy.

Like so many other such pleas, this was warmly sup-ported by delegates to the subsequently became bogged down in the mass of burcau-cratic committees that abound within the component of the proposal but both the CWS and the CRS have agreed to meet with the cratic committees that abound within the component of the proposal but both the CWS and the CRS have agreed to meet with the cratic committees that abound within the component of the proposal but both the CWS and the CRS have agreed to meet with the cratic committees that abound the discuss the matter this month within the co-op movement. The last major compt at detail, forcing change in the co-op The

movement was started in the carly 1970s when a regional plan was put forward to merge small societics into larger groups, thus enabling them to compete more effcctive'v with the large multiple chains.

short of the 25 regional societies has slipped hack from 7.1 per envisaged, individual societies societies in the past the CWS cent three years ago to 6.8 per arc apparently very reluctant to may want to see signs of a cent by war. EARN OUR HIGHEST RATE

LOIGKING YOUR MONBY

OF INTERPSTWITH

AWAY ES

If you want to earn high rates of interest, most other schemes available require you to lock your money away for a long period of time. Now Gateway Golden Growth Bonds give you the flexibility to plan your investments.

Only you know when you are going to need your money, so you choose the period you wish to commit it for. Yet at the same time you earn high rates of interest.

The minimum investment is £500 and you can choose periods from 1-5 years. At the end of the period you've chosen you can withdraw your money. Or leave it with us and you'll earn the higher rates of differential which go up year by year until the highest rate is reached.

If you choose 5 years you'll immediately earn a guaranteed 2% extra interest over the variable Investment Share rate. Leave it with us after 5 years and this attractive rate continues.

Your interest can be added to your account or paid half yearly or monthly.

CURRENT INVESTMENT 5HARE RATE 8.75% NET	Net	Gross*
Invest for 1 year you earn + .25%	9.00	12.86
Invest for 2 years you earn + .50%	9.25	13.21
Invest for 3 years you earn + 1.00%	9.75	13.93
Invest for 4 years you earn + 1.50%	10.25	14.64
Invest for 5 years (and thereafter) you earn $+2.00\%$	10.75	15.36

\*To those liable to tax at the basic rate of 30° i. Your liability to basic rate income tax will be paid by the Society.

All you have to do is pop into your nearest Gateway branch or fill in the coupon below.

A memento of the day you start to earn high interest.

For a limited period Gateway Golden Growth Bond investors will receive this beautiful set of coasters, featuring pictures in sepia by the famous Victorian photographer, Francis Frith.

issue. The main reason is that the action is to insist that the dispute bas gone beyond its dispute goes through the machi-origin—local differences at Pad-...nery. Officials privately admia dington station over parcels that that is sometimes the only office manning—into the thorny way the union can control its field of procedure and sacrosanct mochinery of negotiation.

The union insists that the action of local management at Prddington. in not working brough procedure, undermines has been maintained.

The management replies that its attempts at consultation locally met stonewalling. The changes in parcels traffic, which necessitated alterations to work rosters, could no longer be ignored. In April this year, manage-

ment at Paddington put forward proposals to local union representatives for alterations in work rosters for parcels office staff. The proposals followed a considerable decline in ordinary parcels traffic, but a corres-ponding increase in Red Star parcels, which use designated trains to deliver parcels within

bours. The changes involved alterations to starting times and work patterns, and the transfer of about 50 of the 176 staff to other jobs in the station. Assurances were given that there would he

no redundancies. The management says that there was no reply to its proposals for 11 weeks. British Rail says that union representatives walked out of a further meeting, and falled to turn up for another four consultative Frustrated by months of ioactivity, which it saw aimply

as the local union's method of rejecting the changes, the local management eventually told the union it would introduce the changes oo September 3.

### Rosters

The union fastens on this aa the action which altered the whole complexion of the dispute. What was a grievance by parcells staff, wbo were worried about a drop in earnings through being moved away from jobs with a high overtime potential. became a national issue which threatened normal

Issue which unreatened normal negotiation procedure. Under machinery agreed in 1956, "arrangement of working hours, meal intervals, including local rosters and working diagrams" have to be ennsidered hy the lowest tier of Britisb Rail's negotiating machinery, the local departmental committee.

that consultation alone is not sufficient on such issues as changes to rosters,

The NUR's policy in dealing

way the union can control its members.

The union says that British Rail, through the action of its local management at Paddington, is opening the way for wide-spread unofficial action. The the sentible base on which union, powerless to dispet the industrial peace on the railways, force of the action within the discredited machinery, would be

3-5<u>9</u>

γ.

 $\mathbb{R}^{2}$ 

÷. F,

unable to act. The union rejects accusations thtat the strike would not be taking place if Mr. Sid Weighell, the NUR's moderate general secretary, had been taking the executive meeting which decided

to call it. Mr. Weigbell is ill in hospital.

### Intransigence

He did unofficially meet Britlsh Railways Board member: after the first of the one-day stoppages at Paddington. He offered proposals that might have led to a settlement, but

they were rejected. Once that intervention had failed, Mr. Weighell acknow-ledged that a serious principle had been breached and that the union's action must become more widespread.

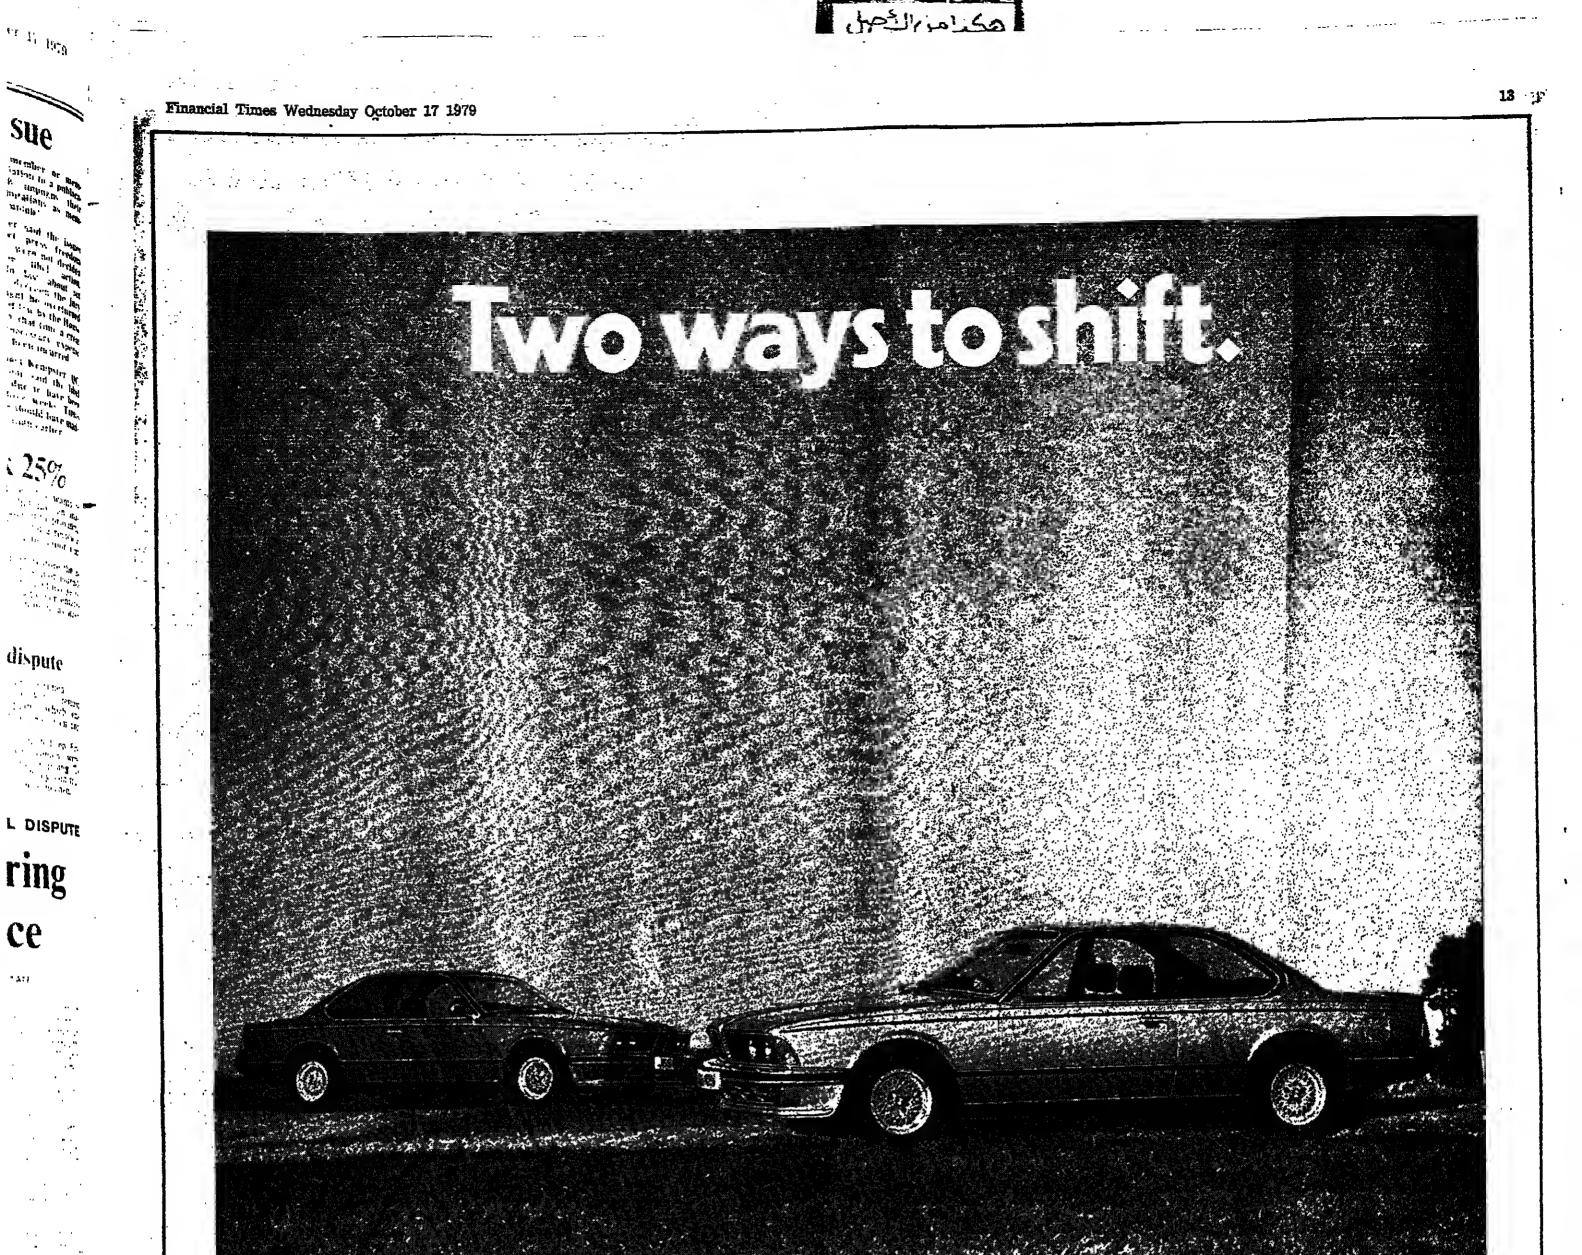

It is recognised, though, that relations at Paddingion have not been good. The intransigence of the local union at the station might bave led not to serious industrial action but to the union's disciplining some members had management acted differently.

The union has also accused British Rail of poor management at the station. It points to a letter to customers from Mr. Leslie Lloyd, general manager, which claimed there was little support for the action among station staff and that most agreed with the management's decision simply to introduce the changes.

and management, Union nationally, agree on one thing-that such a dispute should never have reached national level ond grown 10 such importance.

The attempted changes at Paddington are not directly con-necled with talks that have been going on with the unlons on productivity in the industry. which micht lead to the loss of as many as 40,000 jobs. But the issue does reflect the Board's concern about efficiency, particu-

larly in the freight business. It is just one of the ironics of the complicated industrial relations of the railways that The agreement makes clear the NUR ran call such widespread action with the aim of preserving peace in the industry.

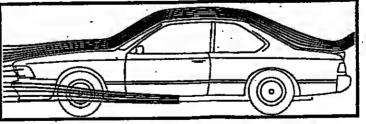

For those who wish to enjoy the most exhilarating and civilised motoring BMW now offer the 635 CSi Coupé with the option of automatic transmission as well as the five speed manual sports gearbox.

DISPECTACE.

Both the manual and automatic transmissions have been perfectly matched to the 3.5 litre electronically fuel injected engine which develops 218 bhp at

5200 rpm. The level of refinement of these coupés is identical – both

The BMW 635 CSi's front and rear spoilers allow for better directional stability, roadholding and cornering at high speed, by reducing uplift by up to 15%. The overall body shape assists the modified chassis and suspension in transmitting optimum levels of engine power to the road, thereby making the performance more responsive and the car safer to drive.

#### Price: 635 CSi/A: £18,740. (Price correct at time of going to press. Source of figures: BMW.)

Insurance. Our new exclusive 'Sureplan' Insurance Scheme guarantees, under normal circumstances, to quote, offer competitive rates and fast approval of accident repair estimates. Your local BMW Centre will be happy to introduce you to the scheme.

Leasing. Your local BMW Centre can also provide comprehensive advice and assistance on leasing arrangements for your BMW.

# For the joy of motoring.

Every major airline in the world carries packages for Emery Air Freight.

And they carry thousands of them. Day and night.

In fact, we send more goods worldwide than any other air freight company. So there's no problem we can't handle.

Which means we have a lot of friends on the ground too. Our satisfied customers.

We can collect your package from your office, rush it to the airport, and onto the first flight that's going your way.

At its destination, we speed it through customs, and can deliver it to the door.

And if that's not enough, our unique computer tracking system can pinpoint the exact whereabouts of your goods. Anywhere in the world.

There are teams of experts at our 140 offices throughout the world. All ready and able to handle your freight as safely as if you were carrying it yourself. So when you choose Emery to ship your goods, quite simply, you're choosing the largest and the most efficient air freight company in the world.

Small wonder that everybody up there likes us.

### Financial Times Wednesday October 17 1979 THE MANAGEMENT PAGE

ISS, with headquarters in Copenhagen, has changed its corporate structure twice within the past year. Hilary Barnes reports

# A passion for management

ONE GETS a strong impression that management organisation is a passion at ISS A/S in Copenhagen. It is discussed enthusiastically and interminably, but not to the detriment of what is one of Denmark's most successful companies. Sioce 1982, when Poul Andreassen became managing director, it has developed from a Kr 20m (£1.8m) a year Scandinavian operation into a Kr 3hn (£265m) a year organ-isation operating in 15 countries and with aboot 55,000 employees world-wide.

EEP

ەر مەربى ئىلىمى مەربى

14 11 14

Rapid growth has required a continuous assessment of man-agement techniques and atructure to adapt the group to its expanding role. Last year, with a slightly apologetic note, the most ambitious reorganisation project to date - a matrix structure - was launched. "It is true that the organisation of ISS has been changed fre-quently ... " a brochure pre-pared by corporate head-quarters told managers as it prepared them for yet another shakeup shake-up.

But today, after 11 months of intensive preparation for the matrix organization and after five · months' experience with the new structure, the matrix system has been abandoned and managers are busy sbaking down to yet another structure. ISS stands for International Service System. The group's operations are within aeven main fields: cleaning and maintenance. security services, laundry and leasing of garments and linen, huilding and total interior service, energy control, catering and canteen management, and supply of chemicals and equipment for the cleaning and maintenance industry. Corporate planning does not Maintenance Corporation, New

The operators take the in this field and has linked up with Skandia UK Insurance view that deotal treatment is expensive anyway and that the Company-the UK general insurance subsidiary of the costs will increase because employees will make much more use of private dental ate Skandia Insurance Group. facilities once they realise insurance is available.

Bul something is rotten in the State and according to the Royal Commission on the health these schemes great emphasis was laid on the fact that dental services, it is the state of the nation's teeth. According to the report, "dental health is part load nff dentists operating williof general health and by any in the NHS system and would standards the deotal health of enable excentives, employees

the nation is poor." and their families to take ad-vantage of the most advanced In addition there has been growing dissatisfaction among dental dentists over the niques, many of which are not available under the NHS. Above certa in operation of dentistry within the NHS and the method of all, the dentist would be able to give the patient the time necessary to provide a first-class It appears, remuneration. though there are no official statistics to confirm or deny. job-and charge accordingly, that more dentists are refusing It is not our task to question to provide treatment under NHS the assertions made in such conditions and are working outside the system. This trend is the raison d' etre for the introreputed to be strong in London and the South East. high costs of getting first-class

The conditions would therefore seem favourable fnr a move into dental insurance and last month two company dental insurance schemes appeared on the market, but not from the three major medical insurance companies. One is from a small independent, Allied Medical Insurance, and the other from a newcomer in this field, Private Dental Care.

Allied Medical has been operatiog in the medical insurance field for the past few years inspections, and most other —it was originally part of the treatment. It applies not only

to the employed but the cmployee's spouse and children, and covers orthudontic treat ment. There is a limit on charges for each kind of treatment in order to limit the underwriter's liability, but the limits are generous.

EDITED BY CHRISTOPHER LORENZ

Each plan has slight varia-tions and the documents need to be studied carefully.

The major difference betwee: the two plans is in the inclued failed Allied Investments Group of costing. The PDC plan which was taken under the makes a straight charge of 150 wing of the NEB in 1978, per annum per adult and 235 per annum for each child under 18. There are group bought the medical insurance discounts depending on the company from the NEB. number of employees in the scheme, ranging from to per cent for 10 employees (excluding spouses and children' to 25 per cent for at least 100 employees.

Allied Medical operates a completely different method; this reflects the actual cost of claims in a group. The basic rates are \$32,80 for an em-physer. £65,60 for husband and wife and 198,40 for a family The company pays half the toral haste prentium at the heginning of the year and the balance at the end of the year, adjusted to take into account the actual claims during the year. Theoretically the balance could be ml. There is a matimmm premium payable icrespec tive of the amount of the insurance would help take the claims.

PDC insists that the henefictary undergoes an annual inspection, which is covered ov the insurance, otherwise he of she is no longer eligible. Allted Medical is lax on this point, regarding such a condition as im

enforceable. Companies Interested having dental dustrance () their slaff should study both plans carefully, taking into occount the views of their enployee henefit advisers statements. But they illustrate possible,

The three major insurers all duction of dental insurance, slate that they have no plans Executives need it to cover the fur entering this field. Thuy point to the absence of any reliable statistics on which to base the premiums. They warn of treatment. Dentists need it in order that their patients ran the dangers of costs escalating For example, the cost of beyond those originally for-having a crown fitted can yary seen as employees make use of from £50 under the NHS to this insurance. view? Wa take it that you mean that yours is a part-time (? evening) husiness, and that you have (? daytime) job as well. If so, there is a choice of loss reliefs open to ynu, under sections 168 and 169 of the Income and Corporation Taxes Act 1970 as well as under section 30 of the Finance Act 1978.

If your accountant needs a second opinion on some aspect of the 1978 provisions etc., be may like to write to us direct.

### Closing down a company

Could you please advise me as to the simplest method of closing down a company? Your best course is simply

not to file any annual return. In due course the Companies Registrar will write pointing out the default and that the Company will be struck off for want of compliance. By not respond ing the company will incur that penalty and will cease to exist on being struck off the Register.

No legal responsibility can be accepted by the Financial Times for the answers given in these columns All inquiries will be by post as soon onswered

mineral resources were laid down; either as a result of violent upheavals or slow, gradual movement. Pretty soon, man realised that certain of these

minerals could be utilised for practical benefit. The only obstacle was getting to them. The same problem exists today. And it's a problem for which Craelius provide a specialist answer. Craelius design and manufacture an enormous

range of drilling equipment for the mining and

contracting industries. But behind the success of this one company there lies an even larger success story.

Craelius are part of the growing Unicorn

Industries Group. And all the dozens of companies worldwide which currently make up the Group are likewise specialists in a particular field of abrasive technology.

Abrasives may not sound all that prepossessing, but you'd be surprised how essential they are; to industry, and therefore to all of us. Whenever materials need to be smoothed or

shaped, cut or cleaned, Unicorn's mastery of this sophisticated technology is needed. That's why we're optimistic about our future

prospects as a group. Because there's every reason to suppose that people are going to go on wanting cars, cookers, pens; aircraft, glasses and all the other things our expertise helps to process or manufacture. As well as wanting us to help harvest the earth's

Datural resources.

# The Craelius Group.

#### INTRODUCTION

Vestion is a leading manufacturer of heart pacentakers in Europe and a prominent manufacturer of certain manufacturer of heart pacentakers in Europe and a prominent manufacturer of heart pacentakers in Europe and a prominent manufacturer of heart pacentakers in Europe and a prominent manufacturer of heart pacentakers in Europe and a prominent manufacturer of the latest developments in micro-circurery. These high technical standards have resulted in a world-wide demend for Virstoric products and exports intoin The Netherlands account for approximately 30 per cent, of its sales.

#### HISTORY

HISTORY Before ifounded this business in 1956 i) worked in the design department of The Netherlands Cancer Institute in Arrayerdam. One of the last projects that I was involved in was the design of an unstrument for quick determination of calcium and magnesium concentrations in the lumam body. This was carned out by phonometric measurement and at the time I hought these would be broader interest for this product if I could construct an instrument flaz would enable clinical (chanical laboratories) owith calcium and megnesium daterminestions. With this idea in mind I designed such an instrument in evening hours and later I and if the Time Bellop, who was kind interest at an instrument in evening thous and later I and if to One. Bellop, who was kind in the rever product started to develop and I decided to lave The Netherlands-Cancer Institute and later my could started to develop and I decided to lave The Netherlands-Cancer Institute and atter my cound started to develop and I decided to lave The Netherlands-Cancer Institute and and who later became, and is to this day, a member of the Supervisory Board.

In 1961 the Universety of Groningen had developed a heart pacenteer which was implanted in 1962. In close contact with that University we worked on the further development of the pacenteeve and samed to explore production and sales. In the early vasa of pacenteer the functionalogy. Vibron and others in the feed had to overcome a number of problems because the turnan body is a utilized and others in the feed had to overcome a number of problems because the turnan body comparatively large and banctoried for approximately 10 months, they constant of battaines and discrete components moulded in governance, provincious and considerable technical improvements have been rando since 1962 to increase the reliability and fee and to reduce the weight and size of pacenteels.

ta 1963 i formed the Company and the business was moved from Amsterdam to a factory to Dieven, near Archem.

At first, all our sales were reprice through independent distributors but, by 1967, we felt that we should have close contact with the mader in order to improve profit margins, pirot batter service and obtain information to develop new products, in the years that immediately followed we set up sales subditimits in Germany, France and the U.S.A. Is England we formed a subticity, Vitames U.K. Limsted, for the purpose of instrumentational protocorbits on a small scale. This patient distributed the beginning of the subbicity instruments of a limit scale. This patient distributed is

Between 1961 and 1973 annual sales increased from D. Fis. 340.000 to D. Fis. 21 million and the sumber of employees from 10 to 258. Due to this rapid development. Visition's working capital requirements increased and in 1973 a group of U.S. investors, which included subsidiaries of Carbank, First National Bank of Boston, First National Bank of Chicago and accounts managed by T.A. Associates, subscribed for approximately 0. Fig. 4 million of next thans and subordinated convertible loan notes. This provided the foundation for the next phase of development.

In the early 1970s it was realized the foundation for the next phase of davelopment, In the early 1970s it was realized that the pacemaker industry would shift to hybrid circuit echnology which might also have applications for clinical laboratory instruments. This serie form of hybrid circuit technology used much smaller components soldered on ceramic plates wiseless activations, the resistant of which a number ward medical in a circuit, were screened in the neglective configuration on the common bare applications for a circuit, were screened in the neglective conductors on a circuit technology to the form of this. The development of the integration of algo-conductors on a circuit present plate in the form of this. The development of the integration of algo-conductors on a circuit in early 1971 to establish a manufactoring subalidary. Yitarel inc., for the medication of semi-conductors and components in San Diego. California, to faiti Vitatouries issued (or form life and high reliability micro-circuits. The study and technology equilable in California were imponent factors in the location of the subsidiary.

#### PRESENT BUSINESS

The activities of Victory are now organized into two principal divisions as follows:

#### The Medical and Semi-Conductor Divisio

The Medical and Semi-Conductor Division The Medical Division comprise activities relating to the development, manufacture and sale of parents in a electrodes and test equipment. The Divisi generation of parents has been considerably reduced in sure. New Haum to their is have been available to simula-the partial parents of the complicity of the start of the division of the second second the software parents of the complicity of the start of the division of the division atomics the start of the complicity of the division of the division of the division atomics designs are highly advanced. The product division does not his field the production with the normal start of the division the scattering of the division has approximately of per cent, of the north and 15 per cent, of the European parents and has been obtained.

The Serri-Conductor Division, which is a sub-division of the Medical Division, is based in San Frige and completor fulfils the Medical Division of domand for hybrid mission-creans. Techniques in mero-creat assembly include spoxy die bonding with utsample and thermaconic wire bonding. All doctamics are hermotocity scaled. During the complete production process inforcers inspection proc. durins are carried out according to the USS food and Dorg Administration's another the field. Performed and according to the USS in the state of thermotic the stating research control on the field. Performed and the state of the state of

Scientific Division The Scientific Division contraises the manufacture and sale of clinical biometry manus. This Division samufactures a tango of small photometers and a machine stru-manetary for the sequicements of private and bospital laboratories. During 1977 the

Division's main product, the P.A. 800 programmable island analyser, was introduced success-fully and sake in 1378 have reached a penetration of approximately 15 per cast, of the West European partiet, Future development plans are control around a micro-processor control system and as modules. This will enable the Division to embanics further Cinical laboratory sakes opportunities, and provide the groundscale for one fields such as blood theology, and to enter opportunities and pro the larger industrial a

Visitron is now represented in 48 countries by 71 cales atlices and 64 distributors, Its turnover in 1978 was split geographically as follows:

TRADING RESULTS

In the five-and-s-half veters covered by the Accountants' Report (as say out in Appendix I) states have atmost doubled. Per-tax porties have shown in even (same rate of growth and the excited Account for the fees the months of 1979 Indicate a perturbative encountegring transit, See over this period of years, Visition has shown, in my opinion, a very astisfactory record of growth in cells and period. I also draw your attention to the portils hardcast for the full year ending 31% becamber, 1979, which incorporates the excited results for the sit months to 30th June, 1978, which is act out to

The ported covered by the Accountants' Report does consist, however, of certain years of faster growm and others of a less exceptional performance. In particular, two points desarve special comment: the year 1978, and the profit margins achieved during each of the siz accounting periods,

The product of the year 1976 were affacted by Vicatoria diffuctive on the product and grants and product of the year 1976 were affacted by Vicatoria diffuctive on the later half of 1977 in obtaining supply sources of count micro-circulary components to meet the very demanding techniques in the later design of poolinations. Accordingly, the decision was taken to ported where estimated to the later design of poolinations. Accordingly, the decision were taken to pool these estimates and the later design of poolinations. Accordingly, the decision were taken to pool these estimates and the later design of poolinations. Accordingly, the decision were taken to pool these estimates and the later design of poolinations are defined to poolinations. In this of 1976, At the same time the majority of the considerable costs of catabolic takes costs and the later design. Accordinations, the same defined to the later design. Neurothese, k was that action which allowed the development of the later generation of graundess of which the later design of poolination which allowed the development of same takes the later design of the later design of poolination of graundess of which the later design of the lat

÷., ..

With the exception of one year, 1978, which is explained above, Vietnan has improved its profit mergin in every year since 1975. This is a result of the decision at that time to exploit the market for the higher-sciencicity products which have a bighter profit mergin.

#### SUPERVISORY BOARD

The functions of the Sopen/Borry Board are principally the expervision of and the provision of advice to the Managing Board. These functions are exercised with a view to safequencing the best interests of the Company as a whole. The Supervisory Board is wholly non-executive and is elected by the shareholders in General Meeting (San Appendix V).

#### This mandees of the Supervisory Board are:

A. Byttantimosk (aged 69)-the Chairmen. After a long caver with IBM is has since hald applications as Previous of Sperry Rand Holland N.V. and Mohawk Data Sciences Netherlands N.V. He is now Chelman of the Supervisory Board of the latter and is also a member of the Supervisory Board of aix other companies at The Netherlands.

P. A. Broeke (aged 80). He is Vice Chairmas ht Tucker Authorny Holding Corporation and and General Penner of T.A. Associates. He is a director of Wang Laboratories inc. as other comparise quoted on stock exchanges in the U.S.

L. C. Ebelong (aged 57). After obtaining his doctorate and working for some yous in inchemistry research he has supervised the laboratories of starsmi bospitals. He is correctly sead of laboratory work at the Dutch Navel Hospital to Overvees.

C. Scienkidding (aged 70), After a long caner in banking, including appointment as Daputy Managing Director of the Nederlandse Owerse Bank N.V. in Amsterdam, he is now President of the Supervisory Extends of J. 72. Daugua's Kottle S.V. and J. G. v.d. Beng & Co. B.V.

D. J. Tarmaner (aged 53) has been appointed to the Sepervisory Board, with effect form 1st November, 1878, to replace C. Scholdung who will return as a member of the Board in 1980. J. Tommer is a Registranceuntant, and has build financial appointments in Royal Durah Shell. Benghass Internetional Fashbac Group.

It is proceed that, following the lating of the Onlinery Stame on The Stock Exchange, a U.K. resident be appointed to the Supervisory Board,

#### MANAGINS BOARD

The statustive management of the Company is in the hands of the two members of the Managing Board.

A. H. Elianten (aged 54). 1 are the Managing Director and have been a member of the Managing Board since the Company's incorporation.

W. G. van Kalmpanse (aged 40). He joined the Managing Board as Financial Director on January, 1978. Prior to this, he had 15 years' experience in international memogenerit finance, he spat recent appointment having been Managar of Roance and Administration, Single Bucy Macange Int, in Manaco, an associated company of one of the largest Dot should be companying.

## وي: امن العمل

### Financial Times Wednesday October 17 1979

#### The senior management of the operating divisions is as follows:

Medical and Sand-Conductor Division is the followis: The manupement of the Division is shared by Mr. Blankestijn and Mr. Renine. A. J. Slankestijn is eged 37 and joined Visaton in 1998. He has been Joint Managing. Oractor of Vizapon Medical B.V. since 1375 and his main responsibility relates to eales and marketing.

A C. M. Ranking is aged 36 and joined Vitation In 1971. He has been Joint Managing A C. M. Ranking is aged 36 and joined Vitation In 1971. He has been Joint Managing Director of Vitation Medical B.V. sales 1976 and his principal resonabilities relets to Research and Development, production and the Semi-Conductor Division.

#### Scientific Division

R. Gerstang is British and is uged 41. He is responsible for managing the Scientific Division. He joined Visatron in 1967 and his been Mesaging Director of Visatron Scientific 8.V. since 1977.

On the whole, the rear of the management have been with Visition for a considerable paried of time. However, the rapid developments in this field, in particular in micro-electronics and hybrid micro-crustry, have necessized the recruitment of some management from outside Visitors, particularly where to new international operation brimoleed. As a seek, management and technical expenses gained with component such as Phillipse, Feichal and General Electric Company in the U.S., the grantly added to Vitation's capabilities.

. . . .

. . . . Contently there are eporoximately 440 employees, of which some 310 are to The Natherlands and 130 in other countries. Of these, some 245 are directly involved to manufacturing, 75 to marketing and sales, 45 in research and development and 76 in administration and manopement.

Vitetron's Dearations require a high lovel of technical still and there are intensive training programmes for all manufacturing staff. Messegments is developed to a large degree from existing tait. This has contributed to the good relationship between management and exployees and there has never been a strike.

Under Netherlands law, every enterprise with 100 or more exployees is obliged to have a Works Council, whois members an elected by the employees. Joint makings between the Works Council and the Managing Director are hald of least six limits a year. Changes in general working conditions, wages, hours of employment, sanf making, welters and related members require the approval of the Works Council. The Works Council must be contained, and instated members require the to the Managing Board II, for instance, a change in the activities, expensionion or control of the strengthes is being considered or if a material investment or a substantial increase in borrownege is being considered.

#### PREMISES

Visimon's Head Office and principal menofacturing location are at Diamo, ease Amhem, These premises an brehold, and consulta some 100,000 sc. ft. which has mainly been constructed ance 1970. Df this some 35,000 sq. ft. of new metufacturing premises, incorporation some of the mest advanced building sectionicate for high technology menufacturing operations, was corrected by the consector on 24th August, 1979. An area of adjacent land is rested for car part facilities.

.

Vication has leasehold factory and office premises totalling some 20,000 sq. ft. in Sen Blogo, California, which were built to catachication in 1977 and some 4,000 sq. ft. at Maidenhead, Barkshive in the U.K. and eight other leasehold premises, all of which are sales offices and distribution

The freshold property of the Company at Kaneslwedy 24, Diaren, whe velocid as at far ember, 1979 by Jones, Long, Woothon, B.V., in D.Rs. 12,500,000. Particulars of these hold and leasehold properties and the valuation are act out to Appendix IV.

#### WORKING CAPITAL

The members of the Managing Board are of the opinion that, taking into account the proceeds of the issue and the bank and other facilities available, Vitatron has adequate working

#### PROFITS AND PROSPECTS

FROFITS AND PROSPECTS For the six months ander 30th June, 1979, the audited tumover was D.Pa. 25.2 million and profit before trachion was D.Pa. 3.7 million. The members of the Managing Board are of the openion that in the absence of metoreseen circumstances, profit before taxetion for the six months enging 31st December, 1979, will be not less than D.Fa. 4.1 million. Consequencity, it is anticipated that, profit before tax for the full year ending 31st December, 1979 will be not less than D.Fa. 7.8 million.

The principal accumptions on which this forecast is bleed are set out in Appendix II of this document together with copies of laters relating to the forecast from the expanding Accountants, and from Grindary Branchs Limited.

The members of the Managing Board view the long term future of Vitation with confidence based on the proven skills of the menagement, workforce, sales force and research staff of Vitation

In its the infamilion of the Company to pay dividends equivalent to a gross yield of approximately 6 per ceral, based on the score price. No dividends have been pair to date and it is left approximately that the first dividend the score price. No dividends have been pair to date and it is left appropriate that the first dividend though to the price of the price of the score of the lighting. Thus it is the internet of the Managing Board to recommend and the Supervisory Board to approve a dividend in respect of the year ending 31st Decomber 1979, payable in May 1960, of D.FR. 0.225 per share and an internet dividend in respect of the year ending 31st Decembor 1990, payable before 31st Decoupt, 1920, of the same amount, bringing the small yield to 6 per cent, based upon the issue price.

As explained in the paragraph balaw haaded "Exchange Control and Taxation", these dividends will normally be payable after deduction of a 15 per cent, withholding tax, with the result that U.K. sharmholders will be entitled to a net dividend of D.Fis. 0.19125 with respect to each payment of D.Fis. 0.225 gross.

Based upon the above profit forecast and assuming that taxation for the full year will be in Eno with the charge for the first so months, the proposed rate of dividends woodd be covered

On the basis of the weighted average number of Ordinary, Shares in basis during 1979 and above profit forecast, the fully taxed earnings per share (diluted) would be D Fis. 1.05. Accord-y, at the placing price of D.Fis. 7.50 per share, the price/earnings ratio would be 7.1 simes.

The Company is considering the introduction of a stock dividend option actions, where phaseholders would be offered the choice of taking addingual Ordiany Stores as a atomiana receiving a cash dividend. If such a echane or implemented, different U.K. and Mathefands considerations from those mentioned in the paragraphs above and below may apply. The Ban England have confirmed that U.K. resident shareholders may alect to receive their dividend the form pl additional states in lieu of each.

#### EXCHANGE CONTROL AND TAXATION

I am advised that, upon listing being granted, the D.Fis, 0.25 Ordinary Shunasof the Comp. will be texted as "Siberalized" foreign currency securences and that no investment currency prem-writ be payable on porchase. Provided that U.F. residents ununge for the shares to be parchased an Authorized Depositary, no spaced; application to the Bank of England is required.

. . . .

an Authorized Depositary, no space(c application to the Bank of England is required. ) am also advised they, subject to cartain exceptions, under the provisities at present in fit (indered, peed to U.S. resistents who are beneficiarly emitted to dividends, will be subject Natherlands withholding Lix at the reduced rate of 15 per clim. This withholding that a allow as a check equator any U.K. as persible in manuel of the persons withholding that a allow that beneficiarly emitted and a subject of the dividends. It must be noted, howe that U.K. residents who are tarobale on the remittence basis in expect of feeting and and a statistic induced to the data and a statistic the U.K. and those who are British subjects or Resulting the late of the out data carded outside the U.K.), will be entitled to dividends subject the are continued of Netherlands withholding bay only to the outer that the dividends are bas as remitted to the U.K. Dividends tax at the full rate of 25 per cent.

The gross amount of the dividiends, before deduction of withholding tax, will, in general brought into account as income of the U.K. resident recipient for U.K. an purposes, although

contract to the U.N., with the addition of the relative amount of within sing lan,

Different roles from the lorogoing will apply if a U.K. periotent acquires an committen with a business carried on by that resident in The Netherlands.

The above comments relate to the position of holders of D.R.s. 0.25 Dreinery Shires of the Company who are madden in the U.N. for exchange comparing and tax purpose, it is recommended that shareholders who are not so resident should consult their professional advisors, as should any shareholders in doubt of their position.

#### THE LONDON LISTING AND PLACING

. . . .

The following in a copy of received born Peak Marwick, Mile

The Managers & Vision N.V., The Directors.

Since its early development Vitatron has siverys had eq international outlook with a high level of overseas sales. Since 1973 the Company has had a significant level of overseas shareholdes. A facing on the London Stock Exchange has been chosen as it is oriented survaris, the smaller high technology companies and is able to serve the needs of Vitatron.

The development of the Semi-Conductor Division in California and the new construction at Dicron regetter with the maintenance of high standards of research and product development have resulted in the need for a higher level of working capital. The net proceeds of the shares baing insued for cash under this Plocing, which are expected to be D.Ris. 4.7 multion, will be used to lineance the further development of Visatom for which the loundariane have now been lold. The Placing will be avere a symilticent officient upon the Balance Shared of Visatom and, to relevant bits. Appendix III contains a pro-lound chowing the results of the Placing and the cepital restructuring that is salding above.

At the same time I am taking the opportunity of realizing a small part of my investment in the Company by selling 90,000 of D.Fit. 0.25 Ordinary Shares which amounts to 2.0 per cent of the Company's usued Didmary Shares and 10.1 per cent. of the Placing. Inumediately following the Placing I will hold 52.7 per cent. of the Company's issued Ordinary Shares.

	Shares of D.Fis. 0.25 on 18th October, 1879 (see your 10) and benef on 3,653,944

# **Open** government and forecasts

#### BY PETER RIDDELL

THIS COLUMN should really be accompanied by a Balemanmaker who is by nsture openminded and not secretive.

#### Judgment

His main point was to ques-tion whether the Bray ameodment-the clause in the Industry Act requiring the Tressury to publish detailed economic projections at least twice a year-had not been counler-productive. On this view, moves towards greater openness incresse the danger of underminiog the integrity of the forecasters and of the forecasting process.

This argument rests oo the view that economic forecasting is oot a simple mechanistic exercise in which a button is pressed and an nnchallengeable series of projections emerge at the olher end. Instead forecasting is much more of an art in which judgment has to be coostactly applied to the assumptions and to the forecastiog relationships within the model. The result is a whole series of possible froecasts.

Forecasting is also highly political in that the results can be controversial and are always watched closely by by ministers and, of course, by outside commentators. There is thus the possibility that pressures for greater opeoness will lead to the publication of the most politically acceptable involves the wsy in which the variant of the forecasts while projections are published. acolher more realistic variant is used for internal policy decisioos.

This danger arises particu-larly wben there is a formal pay policy. For Instance, the Treasury forecasts published last autumn assumed the successful implementation of the Callaghan Administration's 5 per ceot wage limits which were already largely dis-credited. It is difficult to belleve there were not more realistic internal projections within the Treasury.

The view that the whole process of forecasting may be like carbon showing the ex- corrupted by political pres-pressions of surprise when sures has some plausibility but someone dared to question it does not justify any reversal whether publication of Treasury of the trend toward openness. whether publication of Treasury of the trend toward openness. ecooomic forecasts has had The answer of the more desirable results. The point was cynical Whitchall practitioners recently raised among s group is to argue for publishing of balf-a-dozen concerned everything and to let outsiders directly with either csrrying wallow in the mouods of paper. out or reporting economic This is essentially the U.S. policymaking. The challenge approach to which any in-came from an eminent policy dividual projections (however maker who is by nature onen, sensitive) do not baye the public dividual projections (however sensitive) do not bave the public impset which the more limited

publication of forecasts has in the U.K. My own view—as a consumer rather than a producer—is to

start from the point of principle that the data on which policy decisions are based should be published. Moreover, even if this appears hopelessly idealistic in practice and Treasury fore casts may not always, or perbaps ever, present a "true and fair view" because of political pres-sures, even the published projections reveal a lot about bow Treasury officials view the economy. Heoce tha Bray forecasts with all their limitations are useful for so outsider and can be compared with the many other forecasis published nowa-

you surely just dig a spade or ground, do not set about it with trowel into the side or middle. a pick or a sharpiy swung spade. The old trick is still the chop off a piece with a root best. Stick two garden forks hack to hack joto the centre of and re-plant where you want it it and lever them gently apart, until their handles are flat on the ground. They will pull the But like all smaple jobs, it can he done well or badly. Anyone can divide a michaelroots with them and make a cleaner sod deeper job than any tuggiog by hand or random mas daisy without coming to harm. But if you had to decide whether to divide an anchusa slicing with a sharp spade. Ooce yon have manageable lumps,

you can split them into tens with a knife. Hostas and day-lilles are suffer. especially suited to the two- You fork treatment. Now that they planted cost so much and divide so easily, the trick is worth osing. Generally, make use of tha younger stock outside the old

- even ao. I have seen gardeners split up the old centres aod then sweep the young hits away at the end inth a wheelbarrow.

The future, of course, lies with the young shoots at the edge, so you should save them. edge, so you should save them. They are one reason why plants with fibrous roots are best divided in spring. The outer shoots are then sprouted and there is no heavy wel winter ahead to upset them before they here settled down have settled down.

If you wsot to spilt a daisy-flowered plant into dozens of new ones, and if you live oo a heavy soil, you are advised to wait until March. I sm thinking

particularly of plaots like pyrethrum and gaillardia, white shasta daisies and the best sorts of aster. The tougher ones will look after themselves.

What about the timing for an ... iris? It is a frequent problem. Irises should be split after floweriog, but the expert will prefer to wait for a month, until about mid-July, so that the rhizomes have built up to full strength after the flower is over. Their mats can be cut up the plant is unbappy. It is not

with a sharp spade and will not the plant is unbappy. It is not obtained and other relevant suffer. You ofteo see the newly-fering from eelworm which planted fans of an iris with the lives io the upper crown. leaves cut back to some six Division takes them with it, so in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in these in the section of any good garden in the section of any good g inches above ground in August, it is best to use cuttings from This is out an old gardener's the roots. These root-cuttings trick for neatness alone. The are free of worm, though the removal of old leaves helps the pest may move io later.

ENTERTAINMENTS

GUIDE

If yon want to increase your stock of paronies now is the

new piece to grow away, some- For the rest, the rule is thing which applies to all other straightforward. If the plant has a long tap root, like a dandelion or an anchusa, you early flowering plants, from primrose to sweet-rocket, which should divide the root 10to can also be split io early short pieces some two luches summer.

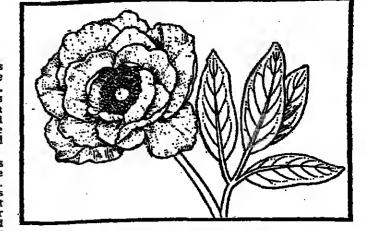

Be sure to water young pieces io dry weather. It is oddly easy damp sod burled for their full danip sod burled for their full length io a aandy soil. Their to think that they can feod for top growth, however, cannot be divided as you will end up themselves on their own roots. What cannol be divided wsll? Delphiniums are not with cext to no root. Almost anything with flowers like a thisile or with big bairy suitable, though I have divided them and regretted the results. Phloxes are a special case. Sometimes, you will see that the young leaves are twisted and

or furry leaves will only be divisible through root-cuttings. Look out, then, for tap roots before you start slicing up the

days when plants are £1 apiece. But be sure you know where such a division is best applied.

### by MICHAEL COVENEY

minutes of Frederic Raphael'a TV series The Glittering Prizes, fully with the challenge to one in chapel and one in a Jewish, he was not a Jew; he of repressive Jewish mores. aid not go the whole hog. The Within this dramatic frame-same could be said of Adam, work, the writing bustles in who dismisses the mumbo Mr. Raphael's characteristically jumho of orthodoxy but is smart fashion: the tease is

a home in the country and an uncle who found Goering a sociable chap. The action unfolds as an examination of Adam'a uneasy but robust friendship with Donald. It is tested when he walks straight into a genteel outhurst of anti-semitism at Donald'a home. But the affend due to the simultaneous orgasm tongued Adam that, no, simul-taneous orgasm is "coming together." There is not quite so much steely precision about the stage-duction gramples manfully with Donald'a home. But the effend- duction grapples manfully with ing Lady Frances binds Adam the problems, but has to resort to his duty by Donald when it is to an awful amount of trund-revealed that her son is dying ling sets and snlppety. inconse-of lukaemia. Donald is wavering quential scenes. Donald's ooset

the

Ravel's Introduction and Allegro, for harp, flute, clarinet and string quartet, sets a peren-nial challenge to more recent composers. Ravel'a flawlessly realised piece, still the heart of the harp repertoire, prescribes an inconvenient body of players -too many to hring into a solo recital, too few to set into an orchestral concert. What seems to he needed is another work or two for (roughly) Ravel's com-hination; and a new City Music Society commission from Roger Marsh, heard for the second time at yesterday'a Delmé String Quartet concert, is evidently aimed at that mark.

Marsh's piece employs Ravel's forces with an extra flute and clarinet. It is called simply "Two Movements," hut "Introduction and Andantino" SUE gests itself at once. The first movement plays very deliber-ately with a pair of chords, extended from time to time into a longer cadence, in solid and unvarying instrumental colours; the pace is increased slightlyfor the second movement, which presents the harp with some mild declamation in octaves and offers a wider range of evanescent textures. At one hearing, it seemed a competent exercise, perversely content to use the expanded Ravellian band for infinitely less inventive purposes. Even Marsh's loaded introductory chords carried only a fraction of the suggestive tensions of Ravel's prelude, though in theory Ravel's harmonies belong to a more inocent idiom.

The aolo harpist was Christina Rhys, no more than efficient in the original Introduction and Allegro-she allowed herself a rudely unstylish accent on the last note of each of her opening phrases. The Allegro was ex-cessively. relaxed, though Richard Adeney and John McCaw among the supporting players guaranteed sterling support. The Delme Quartet on their own played early Haydo. the Quartet op. 17 no. 5, comfortably and with some grace.

You can be sure of a good return from Strathclyde. Scotland's largest region is nich in advantages for industry.

Factories and sites are readily available - skilled men and women are here, with a great working capacity and high educational standards. Special development status entitles industry to maximum UK Government assistance.

# **Responding to** Mr. Brezhnev

PRESIDENT Brezhnev's apeecb in East Berlin ten days ago clearly caught the West off-guard. The Soviet leader announced ucconditional cuts in the number of Soviet troops and tanks in East Germany and at the same time declared a ceadinesa to ceduce the number of medium range missile aystems deployed in the western areas of the Soviet Union, provided that the west refrained from plans to modernise its own medium range nuclear forces.

#### Concern

Yet the western response has been varied. The most positive cvaluation came from Chancellor Helmut Schmidt of West Germany who noted at once, and actually welcomed, the aoparent continuing Soviet interest in negotiations on arms control. A much more sceptical reaction came from Mrs. Margaret Thatcher who told the Conservative Party Conference in Blackpool last week that the west would he looking very closely at Mr. Brezhnev's speech to see whether it represented the opening shot in a campaign to prevent the NATO modernisation programme, or whether it was "a genuine attempt to ceduce tension in Europe." She left little doubt that she inclined to the former interpretation.

The American response has been somewhere in between. Mr. Zbigniew Brzezinski, President Carter's national security adviser, has recognised the Soviet readiness to negotiate. hut has also shown concern that this very readiness could per-suade some of the NATO allies to come down against the plans to improve the alliance's nuclear forces in Europe. These variations in the western resoonse are dangerous

in themselves, for there is nothing to be gained, and a zreat deal to be lost, from internal squabbles. They are also unnecessary. A close reading of Mr. Brezhnev's speech suggests that there is no incom-patibility between a decision in principle to modernise the NATO forces and at the same time to enter negotiations with the Sovlet Union on arms con-

It has long been expected that the ratification of SALT 2. if it takes place, will be followed continental systems owned by ing Mr. Brezhnev's speech with the United States and the almost total suspicion. As an Sovict Union. SALT 3 would opening contribution to what is SOVICI move on to cover mediumwas precisely what Mr. Brezhney was talking aboul.

Soviet Union has developed and deployed a new geerantio of of variosu kinds, it is a leading lamp manufacturer and it has nuclear weapons targeted on Western Europe to which the west has no direct equivalent. been atrengthening its control In the past year or so NATO has beeo preparong its own attempt at correcting the balance. It consists of new and instrumentation division. This aummer, it bonght Systron Doncer in the U.S. for £12.5m : the company specialises in the manufactuce of industrial con-American weapona to be based in Britain and continental Europe. A NATO decision to approve the plan is due in acquisitions have so far eluded it—the Florida-based Modcomp. which makes process control equipment and the French TV December

Yet NATO has also been preparing its own ioitiative in arms control. An alliance decisions to go ahead with the modernisation of nuclear weapons in Enrope will be accompanied by a new offer of negotiations with the Soviet Union on arma limitation. Sioce the new weapons would not be deployed nntil 1983 at the earliest, that leaves plenty of time for talks which, if successful, could even cender the deoloyment unoecessary. The talks would almost certainly take place within the context of SALT 3 The Soviet leadersbip knows

traditional business.

clubs, dance balls and films. At the other end of the spectrum, this perfectly well. That is why the most reasooable interpreta-tioo of Mr. Brezhnev's speech it has a successful defence electronics business: in between is ita ailing medical electronics is that it is an attempt to influence the course of the SALT 3 negotiationa. Of course, the Russians would peefer the NATO decision on modernisadivision. in recent months bas been barsh. The record business, accounting for around half of its sales, has tion to be postponed indefinitely, and it would be naive to pee tend otherwise. But the most important point about the speech is that it sontained noth-ning scanner has flagged in a speech is that it sontained noth-ing which would preclude negodepressed U.S. market: only tiations on the assumption that defence and general leisure re-NATO does decide to modernise. Indeed, as Chancelmain celatively huoyant. lor Schmidt has observed, any sight to the record division's Soviet threats were directed not troubles. British artists are currently less popular inter-nationally than American ones: against a NATO decision to develop the new weapons but against deployment.

#### Opening

The western response there-fore should be straightforward. NATO sbould approve the modernisation programme in December, but it should also stress as strongly as possible its interest in arms control. It might even take positive note of Mr. Brezhnev's proposals. The negotiations with the Soviet Union will be difficult and they may well fall, in which case the west will have to go abead and deploy the new systems. But by negotiations on SALT 3. It would be folly to prejudice SALT 2 covers purely inter- the talks in advance by regard-

AS Sir Richard Cave, ioterests bave been less happy: chairman of Thorn, bid for EMI for that time-bured of motives—because there? he two companies are, after very different. earnings, already mean a dllu-tion of nearly 15 per cent, given poor short-term recovery prospects

Financial Times Wednesday October 17 1979

Then there is the fact that horn's gearing, from a Thorn's nominal 10 per cent, would immediately rise to nearer a third, comparing net borrowinga with tangible ahareholders' funds. And more would undoubtedly have to be poured into EMI. Money is the dowry Thorn brings to this marriage. On the plus side, from Thorn's shareholders' point of viaw, is the acquisition of the defence electronics side. Yet nverall, a bid for EMI which values the group at £146m cmopared with a pre-bld value in the market a pre-mo value in the market uf £105m, may look over-generous to Thorn's share-holders. And they will have to approve this bid before it goes ahead.

EMI's shareholders, on the other hand, may also cavil over the price as it compares with their estimate of the company's worth. Capital employed is £400m, although shareholders funds amount to only £163m takeover of Spillers. But there tory responsibilities in its new guarantee that the next tranche Industry Bill, is no more than of £25m will be the last invest-a pin-prick for the Government's ment the Government haa to industrial policy. Even if there is own feet. Meanwhile Inmos nn question that the NEB will have to raise the required 1100m by selling its sharehold ings in ICL Ferranti, Faircy and perhaps a few other com-panies, and Sir Leslie accepts this. But his statement does underline the fact that Government attitude to the NEB may remain unclear even after the Industry Bill is published.

#### Conflict

It may be that in their haste to fulfil manifesto promises victory, after their election victory, Ministers gave insufficient attentinn to the way they wanted the NEB to behave after the asset sales. Selling off the NEB's minority shaceholdings in private companies and returning its viable subsidiaries to the private sector is only the first, the easiest, atep in unravelling an organisation whose existence conflicts with some of the basic tennets of the Government's nhilosophy.

The NEB currently has four The NEB currently has four apart from its stewardsbip of roles. It is a holding compaoy the lame ducks, could, in for lame ducks, a sponsor of theory, have been done better, high technology enterprises high technology enterprises, an investor in small firms and an investment trust for the Government's shaceholdings in medium sized companies. All but the last of these ace likely to surrive under the new constitution to be

proposed in the Industry Bill. To some of the Government's supporters this is disappointing. Obviously there is no alterna-tive to keeping BL, Rolls Royce and Alfred Herbert in the public sector. But the NEB's high technology activities and ita in-volvement with small companics are more questionable. Indeed the Prime Minister depends heavily in hope and berself is believed to he dubious faith. If this faith is ever justi-about the wisdom of huilding field the NEB will be an up the new electronics com- onomaly that will not be panies, which the NEB regards allowed to survive for lone.

YESTERDAY'S slatement by Sir as its most significant achieve-Leslie Murphy, the chairman of ment. A decision has to be made soon on whether to commit a further £25m to Inmos, the new microchip manufacturer, in which £25m has already been Hovering to the dark tower Like most tourists seeing London for the first time, Chairman Hna of China is making the Tower of London a priority executives are warning that further delaya could jeopardise its

during bis visit later this month. Indeed, I learn that he regi-stered such keen interest in the future. Inmos is one part of the Government's dilemma over the Tower that it is his very first NEB. In many ways NEB'a results have so far been encouraging to its supporters. Apart from the failures at British Leyland and the port of call—he is going there by hovercraft from Westminster the morning after he has settled inth Claridge's. A visit in Covent Garden to watch "The Sleeping Beauty" is also pencilled in for the first day, and only after two sessions

continuing cash shortages at Rolla Royce, many of Ita venures have been successful. Its returns on capital have not yet approached the target of 15-20 per cent by 1981 that was originally set for it, but they have been satisfactory, bearing in mind the performance of the whole corporate sector. Even in its promotion of small com-panies it has shown an entrepre-neurial spirit that has been lacking in some private acctor investment institutions.

#### Anomaly

Nevertheless, the fact remaina that everything the Well ahead of Hua's arrival, the Foreign Office is marshalling NEB has succeeded in doing, its full contingent of Chinese speakers. The numbers will be aweiled by tha temporary ceturn of several officials from and without the need for public money, by the private sector. the Peking embassy. Thus the continuine existence of the NEB in anythine like its

### Financial Times Wednesday October 17 1979 CASH LIMITS AND THE NATIONALISED INDUSTRIES

# A questionable discipline in pay bargaining

economic policy that Ministers have been painstakingly putting Treasury forecasts). togetber over the past six months. So far the Government has got no further than any of cash limits is that they are the ing. So cash limits do not apply its predecessors in working ont a policy on pay in the public wages. Trying to influence wage sector.

6

· · · ·

141 - 122 -

1.7

Of course pay in seneral has been Britain's knottiest economic problem for years. But, for the private sector. Ministers at least believe that they have controlling public spending, not found a coherent solution. Tight found a coheront solution. Tight wages. money and a strong exchange But a confusion about their cluding only the borrowing of rate are expected to force pri- effectiveness in controlling wage nationalised industries in cash vate employers to stand up to bills bas crept into the Governunreasonable pay demands from ment's thinking. In the Civil 1t is supposed to reflect the their workers, or to go under. Service itself, there is little freedom of nationalised indus-This policy may rest on a distinction between public tries from day-to-day political number of tenuous assumptions spending and spending on wage interference. The relationship that the availability of credit bills. So, for the Civil Service, between nationalised industries determines a company's ability strict cash limits are more or to pay its wage bill and that less equivalent to statutory pay competition is strong enough to norms. Unfortunately, it is in the nationalized industries prevent wage increases heing the nationalized industries — passed on in higher prices. But which provide the country's at least it is possible to sketch basic services—that the bardest out a theoretical model in which the policy might work. For the public sector, there is no such consolation.

The first clear indication of at best. the Government's approach to public sector pay came last week, in a series of letters which Ministers sent to the nationalised industries they oversee. While steering well clear of any explicit statements clear of any explicit statements "real" terms-without regard about the desired level of pay to price and wage inflation-did increases, the letters stated that, not set out of control if there in setting cash limits fer each industry's borrowing next year, the Treasury would assume that the Treasury analysed the unit labour costs will rise by "real" spending plans of govno more than the expected rate ernment departments, local of price inflation between this authorities and nationalised financial year and the next.

thinly disguised return to the inflation. last Government's incomes Once cash limits are fixed policy, that the rate of increase they should in theory, be chosen is unduly high and even adjusted only if there is an that it will encourage unions to expect wase rises based on inflation for the year past (expected authority could bave foreseen. to peak at over 17 per cent).

ONE VITAL piece is still rather than over the coming of cash limits to nationalised missing from the jigsaw of year (when the rate should be industry pay bargaining is that under 15 per cent, according to only the nationalised industries' borrowing, and not the whole of

But the main objection to the Government's apparent faith in bargaining in the nationalised industries with cash limits is like trying to tighten a screw

with a spanner. Cash limits were designed for

pay hattles normally have to be fought. Cash limits control only the levels of horrowing. So

Assumptions

Cash limits were introduced to ensure that public apending plans, which are initially set io were an unanticipated upsurge in inflation. So every year, after financial year and the next. Already there has been wide-spread criticism of this pollcy. basis of its own assumptions It has been claimed that it is a about the prospective rate of

The reason for the irrelevance Labour Government decided quite seriously the industries'

their spending, is included in the definition of public spendto the industries' wage bills, but only to the difference between their investment needs and their ability to generate internal finance. In fact nationalised industry managers refer to them as limits on external financial requirements (EFRs).

limits is not just an accident. and government is still far from clear, but for the past 10 years It has been accepted that nationalised industries should behave, as far as possible, like commercial enterprises, with only their general policies and

fought. Cash limits control only the levels of horrowing. So their effect on wages is indirect, at best. Assumptions Assumptions is organised by the Treasury.

Cash limits operated fairly successfully while they were applied for their intended purpose of controlling nationalised industry horrowing. Since 1976 there have been no serious hreaches of cash limits, although there have been a few adjustments to reflect increases in subsidies hetween the annual review;, and nationalised industry borrowing bas been sharply reduced. But in the current year. a sonvicition has spread in the nationalised industries that "there will very soon he cracks in the cash ceiling." in

the words of Sir Peter Parker, cbairman of British Rail. Tha reason for this is that emergency that neither the last year, in its desperation quences of the present policy. Treasury nor the spending to find a substitute for its volun- By 1978-79 cash limits were tary five per cent pay norm, the already beginning to restrain

to try cash limits as a discipline on the public sector. Cash limits for 1979-80 were set on the assumption that prices would rise by 8.5 per cent and wages by 5 per cent.

The results provide no encouragement for the present Government's efforts. Where they could have been effective, in central government and local authority spending, cash limits were unceremoniously aban-doned, with promises of re-visions to allow for pay "comparability" studies on civil aervants, teachers and bealth service workers. In the nationalised industries the original cash limits were retained, and even tightened, by the incoming government. But they had no apparent effect on pay settlements, which were running at over 17 per cent by the and of the last pay round.

It is worth investgating in detail the way that nationalised Industries can respond to a squeeze from cash limits in order to gauge the likely conse-

61 per cent in 1977-78, th ereal problems were more serious for some industries. Excluding British Gas, which notched up enormous profits in a year of oil shortages and freezing temperstures, the other industries had only 11 per cen theadroom below their cash limits and the National Coal Board and British Rail borrowed respectively 97 per cent and 96 per cent of their maximum allowances. Clearly these industries and Britisb Steel, which bas had its cash limits cut in anticipation of its promise to break even by other routes—cutting invest 1980-81, will be hard pressed ment or raising prices—when to get within this year's borrow they foresee a cash crisis. Which to get within this year's borrow-ing limits.

Obviously the bope is that cash limits will impose a regime of strict cost control, but even if this option is accepted, managements can cut costs by reducing output as well as by improving productivity or taking a firm line on wage claims. In sborlage, simply by raising Rail. British Airways and the reality, even with the best will prices. Clearly this was recog. National Coal Board are all in the world, it is usually im- nised by the incoming Govern- engaged in vast Investment pro-

borrowing ability. Although, as possible to raise productivity the table shows, aggregate substantially within the duration the table sbows, aggregate substantially within the duration borrowing was 78 per cent of of a cash limit, which is a single the maximum level permitted financial year. Redundancy pay-hy cash limits compared with ments certainly have to be ments certainly bave to be avoided, as do strikes, which. in most nationalised industries, affect cash flow adversely because of the industries' enormous overheads. So if costs have to be cut in response to a cash sbortage, it is most likely that the quantity or quality of out-put will be reduced, without any reduction in the labour force. Thus the ultimate response to excessive wage settlements may well be a reduction in productivity, rather than an increase. In fact, nationalised industries are more likely to try the two

> way they will choose depends on whether they are monopolists operating in domestic markets where price has little effect on demand, or internationally competing industries,

In the monopoly industries it is easy to respond to a cash

ment in the June Budget, when grammes, which are undoubtedly it lopped £320m off the nation- desirable on alised industries' cash limits, as grounds. But they do not have a contribution to the lowering the market power of the gas,of the Public Sector Borrowing electricity and telecommunica-Requirement. There was no tions industries. Lame ducks which foresee a collision with cash limits normally have no choice but to cut back investment. Indeed both Britisb Steel and British Shipbuilders have explicitly stated

that cash limits had forced them to delay or cancel invest-ment plans. British Steel's apparently creditable achievement of staying well within its cash limits during the past two years, despite dreadful losses, waa due largely to overesti-mates of its investment by £168m in 1977-78 and by £172m in 1978-79. Of course, cash limits were not the only reason for reductions in British Steel's investment. But it is bard to resist the suspicion that cash limits may have led to overestimates of investment needs, What is most alarming to man-agements is that as trade union understanding of cash limits grows, the excessive provisions for investment may come to be regarded as available for paying wage bills

### Hardest bite

Government is determined to But where cash limits seem tn bite hardest is in the industries that are determined to invest right up to the limits permitted by their market strength and their horrowing ability. British

cut public borrowing as a whole. What nobody seems in believe is that cash llmits will make much impression on unims which are well aware of the many ways in which money for the wage bill can be found.

It is evident from column (1) figures are produced on the defi-that there was no fall in the ultions of Columns (1) and (2) share of gross profit in the gross as well as that of Column (3).

share of gross profit in the gross value-added of industry and transport between 1968 and 1978. There were slight reduc-tions in the years 1971 and 1975 which, however, are fully com-parable to those in earlier Cambridge. parable to those in earlier cyclical recessions. The Trea-sury's contention is that "trade union power" squeezed profit margins, and that the increase in money wages "could not be fully passed on in prices." If that were true, profit margins based on historic costs would have necessarily been reduced. Column (1) shows that this has not happened.

The second column (which deducts stock appreciation from profits) only shows that on account of inflation more of the profit accruing to companies was represented by the increase in the value of stocks. While this may impair the companies' liquidity (if they cannot, or, for reasons of their own, do not, borrow from the banks to finance the increase in the value of their stocks), it is not a true indication of a fall in industrial profitability, since it does not impair the return obtained on moncy invested in Industry, as against money which is left ldle or invested in financial assets.

# HIGHLIGHTS

After a hectic day in the City Lex concentrates on three hig stories. The outright takeover hid for EMI by Thorn came as a surprise although EMI is known to have been discussing the sale of some of its operations. The initial reaction in the City was unfavourable. A massive reconstruction of Charter Consolidated aimed at improving the shape of the husiness was launched but Lex has some reservations. Elsewhere some poor figures emerge from Marks and Spencer underlining the reasons for the round of price cuts a couple of months ago. Other stores of the day include Midland trying to sell its stake in Standard Chartered. On the inside pages dreadful news is revealed by Grattan, and there is the unusual move of a Dutch company bicking London for its sole quotation. Furness Withy reports sharply lower profits, and comments are also made on Kode, Time, Spiraz-Sarco, Forward Technology and Wm. Baird.

# **Furness Withy tumbles to** £0.9m after shipping loss

TIm Divi

TAXABLE PROFITS of Furness Withy Group dived from £5.75m to £901,000 in the first half of 1979 on turnover down from £95.3m to £92.3m.

The group's abipping opera-tions suffered a trading loss of f1.1m, against f4.23m pro0t. This includes a turnround to a f1.39m loss at Manchester Liners.

loss at Manchester Liners. However, the offshore side lifted trading prfits from f1.04m to f1.62m, and the non-shipping sector went ahead from f1.33m to f1.59m. Other activities brought in f372.000 (f27.000). These improvements cualled the the group to make a trading profit of £2.49m, compared with

However, interest charges rose

signs that the worst of the shipping stump may be over, but this is not true of certato sectors in which the group has important interests, including container-This will raise the capital to 18.75m shins and small bulk carriers.

They add that although problems remain for the second half the group is financially strong, broadly-based with the

potential for increased profits. Therefore, the interim dividend of 3.55p net per £1 share is unchanged, and the Board says it expects to pay a maintained final of 5.274p. Total taxable profits last year were £12.2m. The half-yearly taxable surplus was struck after profit from sale of ships up from £150,000 to £739,000 and investment income ahead to £1.8m (£1.07m),

The directors say the severe set-back at Manchester Liners about 22m. is to be huilt by Saxon Inn Mntor Hulels, a reflects the continuing depressed market for cellular containersubsidiary of Furness Wilby, al Thorpe Wood, Peterborough, This will be the fourth Saxon ships chartered outside their own trades, the effects of the road hautage strike and the strength Inn hotel. of sterling against the dollar. Vignrous corrective action is LINERS being taken hy Manchester Liners under its new chairman, Mr. W. A. L. Roberts. Three englueering subsidiaries which were incurring losses with no recovery prospects are in liquidation, and the company's resources will be concentrated on maintaining and developing its slupping

interests. Furness Withy (Sblpping) suffered a serious reduction in trading profit from its cargo liner trades, again mainly caused by the transport strike and the slerling/doilar relationship. The Profits earoed by the develop-

In addition in these losses, there will be in the second baif the closure costs. The ultimate loss will depend on the realised values of stock and fixed assets.

#### A 100-hedroom hotel, costing comment

Furness Withy surprised many observers last year by its ability to weather the shipping reces-sion but this is no longer the case, Having made pre-tax profils of £13,3m in the first half of 1977, it made less than fim in the first six months of 1979. The cumbination of exchange rate movements and the very damaging impact of the haulage strike on Manchester Liners profits accounts for virtually all the interim downturn, However, leaving these special factors uside it is clear that Furness Withy's liner operations are feeling the pinch at last .The upturn in bulk shipping rates and Furneses teh-put of other activities provide some cushing to group profils, Even so, a prospective vield

of 5.3 per cent on the shares at 244n is hardly generous.

#### WESTERN AREAS LIFTS PROFITS

In the Johannesburg Consolidated group's September quarterly reports, higher gold prices have made a particular impact on Weslern Areas. Randfostein has also done lictler but proportion of lower grade ore. The mine's uranium production is expected in further improve

SHIPPING

OFFSHORE

Points from the statament of the Chairman BRIAN SHAW:

- ★ Signs that worst of the shipping slump may be ovar, but certain sectors of the market in which Furness Withy has important interests still seriously affected.
- ★ Severe set-back at Manchester Liners due to depressed market for containerships, effects of the road haulage strike and strength of sterling against the dollar.

★ Fumess Withy (Shipping) suffered a serious reduction in trading profit from its cargo liner trades, again mainly causad by the road haulage strike and the sterling/dollar relationship.

\* Profits from developing offshore business and non-shipping activities are encouraging.

"Although problems remain for the second half of 1979, we are a financially strong, broadly based business with the potential for greatly increased profits in the future.

'The directors are therefore declaring an unchanged interim dividend and, subject to unforeseen circumstances, we expect to be able to recommend that the final dividend should also be maintained."

**Barber** agrees to Hanson take-over

Hanson Trost has won the agreement of Barber Oil to the take-over it proposed nearly four weeks ago which values the U.S. energy group at \$162m. Hanson and Barber jointly announced yesterday that they intend to sign a definitive agree-ment by November 16. Hanson will have completed its investi-gation of Barber by the same date. cals business represents about 825m in annual sales.

its offer.

payment

trebles

EDBRO FORMS NEW COMPANY Edbro (Holdings) is forming a new company, Hyva B.V., to date. The offer was first announced on September 17. Barber would not comment on it theo but two weeks later asked Hanson for

"prompt clarification" of cooditions of the offer. the

a new company, Hyva B.V., to distribute hydranlic products for the commercial vehicle industry of its manufacturing aubsidiary, Edbro, in certain European countries. This had previously heen carried ont by wholly-owned subsidiaries. Hyva will be based in Holland with subsidiaries to be formed in other territories Hyva or its subsidiary will acquire the assets of Edbro France and Edbro Belgium for cash, and Edbro will subscribe DFI 525,000 (about f125,000) for 21 per cent of the share capital Hanson maintained that it would be difficult for Barber to reject the offer since Barber had already recommended a lower one from Englehard Minerals and Chemicals Corporation. Englehard has since withdrawn 21 per cent of the sbare capital of Hyva in which Jost-Werke GmbH will own a 51 per cent interest.

VTM BUYS HUGHES (BLYTH) VTM (UK), the London-based sales company for the inter-national VTM/Vitrohm Group, has purchased Hinghes (Blyth), the North of England maker of

interest... The assets of Edhro France and Edbro Belginm will be acquired on a net asset hasis to be calculated on the takeover date. At August 31 these oay-ments would bave amounted to £976.000 and £944.000 respec-tive?s. The moceed's will be used to subscribe for the shares in Hvva and the balance to reduce group hornwings. Assuming no effect nn ssles. the loss of nrmfits in the group the loss of profits to the group In the voar to March 31, 1978 for companies ceasing to trade would have heen about £325,000,

> of thte Post Office, said: "We really need this money because no business can survive uodamaged from a crippling strike of this sort. Today, as we pre-pare to recover the £700m in outstanding telephone hills, every penny we receive will help reduce the hurden." Most customers will receive a

hill for two quarters' rental and ahout nine months' calls when the main hatch of "catch-up" hills starts going out in Novemthe large telephone hills to ber. Three months later, a come and suggested ways to pre-second hill will cover two pare for them. quarters' wental and three

BL and Rolls-Royce car distribu-tor, were suspended at 761p pend-ing an announcement regarding Ambrose has almost 800 plots of land in Lancashire and Merseyside and the acquisition will further enable Barratt to consolidate its position in private an offer for the company. On the stockmarket the Lancashire-

based group was valued at £20.5m.

The group announced that talks were in progress towards the end of last month. At the time directors declined to give any clue as to who the potential hayer might be and were equally tight-lipped yesterday about the identity of the potential hidder. However an announcement is expected in the next few days. Most mentioned as a possible suitor in the past few weeks has been Lourho, which distributes Volkswagens, but it had earlier

denied that it had made an approach. Dutton is predominantly a BL distributor although it also owns Jack Barclay, the Berkeley Square distributor of Rolls-Royce,

Square distributor of Rolls-Royce, and has recently started distri-buting on a small scale for Fird and Chryaler. In the last financial year end-ing December 31, 1978, profits were f4.17m on turnover of f183.6m. For the six months to June 30, 1979 pre-tax profits fell from £2.69m th £2.52m. To improve the gearing ratios, Dutton-Forshaw was conducting a professional revaluation of the group's properties and the direc-tors expected this to show a sur-plus over hook values. In the last accounts fixed assets of the group stood at f15.5m

the group stood at £15.5m

while net current assets were £14.4m. Major ahareholders in the company are ICFG with an 18.1 per cent holding; and M aod G Investment Management with a 7.8 per cent stake.

CONSOLIDATED INVESTMENT COMPANY, LIMITED

**JOHANNESBURG** 

(Incorporated in the Republic of South Africe)\*

The Board of Johenneeburg Consolidated Investment Company, Limitad ("Johnnies"), ennounces that it has sold its wholly-owned UK-besed financial subsidiary, Berneto Grothers Limited, to De Beere Holdinge (Pty) Limited. Attention is drewn to todey's ennouncement by the Boerd of Cherter Consolideted Limited which states, inter alia, thet it, in turn, intende to acquire Berneto Brothers from De Beers es part of its proposed re-orgenisation, which is to be submitted for the approval of shereholders.

Barnato Brothers' main assets end liabilities (other then sharaholders' loans) ere 12,211,560 ahares in Johnson Matthey & Co Limited end e loan liability of \$9.2M.

Tha total consideration received by Johnnies from the sale of Garnalo Grothers was R36,69M of which an amount of R3,55M waa brought to account in Johnnies Income Statement at 30th June 1979 in respect of e payment received for an option granted to the purchaser. Teking into account the fact that the purchaser has assumed Bernato Brothers' loan liability of \$9,2M the consideration effectively attributabla to tha Johnson Matthey holding was R44,3M.

Johnson Matthey is the able marketing agent for Ruatenburg Platinum Mines Limited (e member of the Johnnies Group) and with Rustenburg jointly owns Metthey Rustenburg Refiners (Pty) Limited, which refines the platinum and associated matala pioduced by Rustenburg. For many years Johnnies held a minor interest in Johnson Matthay but in 1973 end 1974 in order to provide further support and accurity to that company increased its interest via Barnato Brothers and tha present holding is equivelent to 23 per cent of the equity.

Johnnies has accapted the opportunity of plscing its holding in Johnson Matthay in secure hands as this investmant has, for Johnnies, entailad certain disadvantages in recent years including the consequences of the system of advance corporation tax adopted in the UK. Johnnies is of that opinion that the funds arising from the sala can be employed with greater financial reward in its business in South Africs, The sale will in no way affect the business relationship which currently axists batween Rustenburg and Johnson Matthey. This transaction will not affect the net assat of Johnnies

shares and there will be no matarial effect on aarnings pershers. Further datails will be made available to shareholders in the

# Grattan profits hit by heavy costs and VAT rise

EXCESSIVE COSTS and the June VAT increase caused trad-ing profits of Gratian Ware-bouses, the mail order concero. to fall 12.2 per cent io the 28 weeks to August 19, 1979. After redexingtion expenditure and modernisation expeoditure and a steep rise in interest charges, pre-tax surplus dropped some f2m to f2.46m. Sales in the spring and

Safes in the spring and summer season iocreased strongly by almost 26 per cent to £105.33m, excluding VAT, against a backgrouod of healthier Iban anticipated demand, reflect-ing the improved range and con-tent of the catalogue, says Mr. taken place but a number of informal approaches have been made to it over the past six mooths. One competitive com-pany, UDS Group, bas acquired 4.39 per cent of Grattan equity in the course of the last year through one of its subsidiaries. Mr. Pickard adds that the directors in conjunction with J. M. Pickard, the chairman. This sales rise resulted in an improve-meot in the company's market share in line with the Board's planned programme.

The company incurred heavy costs throughout the season io handling the level of demand, following stock and order pro-cessing delays at the commence-meni of the period, which were directors, in conjunction with Morgan Grenfell and Co., are exploring means of ensuring the aggraveted by the road ballage strike and a cbange io its catalogue numberiog systems. The large VAT increase brought a sndden decline in further growth of the business, and this would not necessarily

clothing sales and this, coming so late in the season, added to the normal level of end of season stock depreciation.

Interest charges for the period jumped from £0.21m to £1.3m, caused by bigher interest rates and iocreased borrowings, which the chairman says were necessary to support the sales rise and bigber stock levels. Planned modernisation expenditure doubled from £620,000. £310,000 to

Mr. Pickard says it is too early price down 1Bp to 126p and it to forecast the full year outcome, might bave sunk eveo lower had although the autumn and winter season bas started encouragingly fully worded comment concern-

with both demand and sales con-tiouing at the first-half level. For the year ended January 31. ing the possibilities of ciation with another organisa-tion." Things are not looking bright for Graltan, which is com-1979, pre-lax profits were down from a record £11.76m to mitted to a long-term programme of moderorisation and sales expansion. The plans could pay

Financial Times Wednesday October 17 1979

off in two or three years' time, but it is now anyone's guess as to what may happen before theo. The full-year costs of interest charges and modernisation may is raised from 1.756p to 1.866p, costiog £821,065 (£785,840)—the final last time was 4.425p. tolal. about £4m, suggesting a reduced cover for the divideod. Referring to the subject of a possibla takeover offer for the company, the chairman reports that no formal discussions have taken place but a number of which should cost £2.9m if

maintained.

# **Charter Consolidated Limited** PROPOSED RESTRUCTURING

BY ORDER OF THE SOARO,

M. J. MEYER.

Secretary

The board of directors announce that negotiations have been completed with Anglo American Corporation of South Africa Limited (AAC), De Beers Consolidated Mines Limited (Da Beers) and Minarals and Resources Corporation Limited (Minorco) for seles and purchases of cartain assets which are described below. The exchanges will increase Charter's United Kingdom-based industrial holdings and strengthen the cash resources aveileble for the development of its bueiness, furthering the board's objective of creating a better balance between its mining and industrial investments and between its U.K. and foreign earnings. Chertar will retain large and diversified interests in mining both in conjunction with AAC and its associates and otherwise.

As has been announced separately, AAC and Charter have ecquired the interest of Imperial Chemical Industries Limited (ICI) in Cleveland Potash Limited (Cleveland) but AAC has agreed to provide all funds required for operations at Clevaland until February 1980. In terms of the proposals which are now to be put forward, should the continuation of operations at Cleveland after that date be considered to be justified, the mine will be financed without any call being made on the resources of Charter.

It is part of these proposals that Chartar shareholders will receive approximately 26.2 million new shares in Minorco, Issued in consideration for investments to be acquired from Charter by Minorco. Minorco is a Bermudian-based mining and Industriel Investment company with a wide range of Interests In metals and minerals as well as important industrial holdings on the North American continent. Charter will retain its existing Interest in Minorco, and thus Charter shareholders will be able to participate in the future development of Minorco both diracdy and through Charter itself.

Details of the Scheme

The schema will be fully described in a document which it is proposed to post to Charter shareholders and loan stockholdars on or about 22nd October, 1979.

holding ratios of 50: 37.5: 12.5) to enable it to pay off all third party loans, for which they had given guarantees and othar assurances.

Charter and AAC have egreed to continue with operations at Cleveland and believa that that 1979 and the improvaments in the layout of the mine provide grounds for some optimism that the operation can be brought to profitability. Howaver, it has not yet proved possible to obtain a leval of production above that achieved in April and it has been agreed therefor that performance should be reviewed in Februery 1980. AAC and Charter will become equal partness in the project, but AAC has undertaken to provida all funds required for operations to February 1980. As en integral part of the proposals being put to shareholders, and subject to the February review, AAC has undartaken to provide such furthal funds as the mine requires, these funds and those aubscribed to the end of February 1980 baing recoverable with an annual return of 25% as a first call on Cleveland's cash flow. Tharaafter Charter will share equally with AAC in any cash flow from the proje If et env tima a decision should be taken to closa tha mine or suspend operations. Charter'a funding obligations will be limited to a maximum of £4.5 million, being 371% (Charter's former shareholding interest) of the estimated cost if tha mine had been closed now. The board believes that the present proposals in regerd to Cleveland as of very considerable advantage to Charter and its ahareholdars in that Chartes is able to quantify its maximum liability in the avent of closure, while retaining the right to share in eny future positive cash flow of the project without incurring further losses end responsibility for funding operations at the mine.

diamond industry. In view of Charter's increasing emphasis on industrial interests, Dr. A. Spinks, who was a mamber of tha board of ICI from 1970 until 1979, was appointed to the board on 16th October 1979. In addition it is the intantion that on the schama becoming affective Lord Robens, chairman of Johnson Matthey and Mr. H. R. Hewitt, managing director, be invited to ioin the board.

of a aubstantial investment in the international

Mr. M. B. Hofmeyr, who has been managing director since 1972 and chairman and managing director since 1976, will be returning to South Africa next year to join the Operating Committee of the Executive Committee of AAC. Dr. Spinks will be appointed non-executive chairman from 1st April, 1980. Mr. J. N. Clarka, an executive dilector of the company, will succeed Mr. Hofmayr as managing director with effect from today and will become chief executive of the company on 1st April, 1980. Mr. F. J. A. Howard, who has been a member of the board since January 1978, is appointed an executive director with immediate effect.

Mr. W. D. Wilson and Mr. G. A. Carey-Smith have rebred from the board. Mr. Wilson, who was Charter's first managing director and a deputy chairman from 1965 to 1968, has retirad from activa business, Mr. Carey-Smith was an executiva director from 1972 to 1975, and is now chief executive of Anolo American Corporation Zimbebwa Rhodesia Limited.

فجعبت والمألة تبشعونهم الاشار والعاور وور

Listed investments have been valued on the besis of middle market prices on 10th October, 1979 being the last day prior to the suspension of the Charter and Minorco share outlations. In the case of investments held in South Africa the market prices\* on 9th October have been used, ea the Johannesburg Stock Exchange was closed on 10th October for a public holiday. Unlisted investments have been valued by agreement, having legald where appropriate to the market prices on 10th October for underlying listed securides.

Tha proposals may be summarised as follows:

- (1) Charter will transfer to Minorco its interest in Anglo American Investment Trust Limited (Anamint), whose main investment is a substandel holding in De Beers and part of its investment in Anglo American Corporation of Canada Limited (Amcan). Minorco will elso acquire an edditional interest in Amcan from AAC and De Beers, bringing its total holding in that company to 50%.
- (2) Charter will sell most of its remaining assets in southern Africa to AAC and to Da geers. These assets include its shareholdinga in AAC, Rustanburg Pladnum Holdings Limited end others. Chartes will also dispose of its holdings in Anglo American Corporation do grasil Limitada (Ambraa) and Australian Anglo American Limited (AAA).
- (3) From the proceeds of these sales Charter will purchase from AAC and De geers 28% of the share capital of Johnson Matthey & Co Limited. Johnson Matthsy is e U.K. based group, with funds employed in excess of £180 million. Its main businesses include the refining, fabricating and marketing of precious metalsandits banking subsidiary ia a member of the London Gold Market, Johnson Matthey's recent high level of capital investment in the three industrial divisions -- chemicals and refining, colours and transfers, end mechanical products - should provide a firm foundation for building up luture profitability. The acquisition of this holding will appreciably broadan Charter's industrial involvement in Britain and the United States. The duectors of Johnson Matthey have indicated their intention to invite representatives of Charter to join the board of tha company, to replace those nominated by Johannesburg Consolidatad Investment Company, Limhed.

Charter will also enlarge its investment in two mining operations in Europe, Tara Exploration and Development Company Limited end Société Minière d'Anglade, by tha acquisition of further shares from AAC and its associates.

(4) The balance of the consideration due to Charter on these transfers is estimated to amount to the equivalant to £40.6 million in cash. In addition Charter shareholders will receive sharss in Minorco on the basis of ona Minorco shara for every four Charter sharea currently hald, with the option to sell for cash all or pert of their entitlement to AAC and De Beers et U.S. \$4.65 per share. AAC and De Beers intend in due course to place with instluctional investors some or all of the sheree acquired in this way to widan the ownership of Minorco, Sheres in Minorco, or the cesh proceeds, will normally guslify for the invastment cunency premium in the hands of U.K. residents.

Through the enlarged Minorco, Charter shareholders will be able to retain a continuing interest in the assets translened to it, as well as in the operations of AAA and Ambras,

(5), As already announced Charter and AAC have acquired for e nominel consideration the 50% interest of ICI in Cleveland, ICI, Charter and AAC have provided Cleveland with approximately £26 million (in their original share-

#### Effect of the Scheme on Charter

After the Schama becomes affective. Charter's principal industrial investment, in eddloon to that to be acquired In Johnson Metthey, will be its 67.3% holding in Cape Industries Limited. Its other industrial interests, which are wholly-owned, are Elastic Rail Spike Company Limited, MKR (Holdings) Limited (formerly MK Refrigeration Limited), Hsatrae-Sadia Holdings Limited end Torque Tension Limited, Charter will ratain 25.8% of the issued share capital of Selection Trust Limited. 14.7% of the enlarged share capital of Minorco and a 4.3% holding in Rio Tinto-Zinc Corporation Limited. Charter main direct mining interests in eddition to Claveland will be in lead and zinc through Tare, in tin through Maleysia Mining Corporation Berhad, in tungste through Beralt Tin end Wolfram Limited and Société Minière d'Anglade, end in nickel and copper through **.gRST/BCL** 

The proposals when implemented will represent a majos step towards the board's objectives of achieving e better balance between Charter'a mining and industrial investments and between its U.K. end foreign earnings. The board intends to continue to develop and eugment the company's industrial interests, while et the sams time taking advantage of opportunities for profitable investment in mining operations, especially in those ereas end commodi ties related to Charter's existing investments and where its technical skills can be effectively employed. The errangements in regard to Cleveland Potash are ettracove to Cherter in that h will have a right to psrticipate in the cash flow if the mina can be brought to profitability, without the risk of incurring further losses or funding obligations, apart from the limited responsibility for closura costs.

Cherter shereholders will obtsin e direct interest in Minorco which is increasing its already substantial Interests, principally in North America, in the extraction, processing end marketing of minerals, oil and other commodides, by the acquisition of a 50% interest in Amcan. Minorco will be further strengthened by the ecquisition, through Anemint,

Net assets of Charter at 30th September 1979, but as valuad for the scheme in the casa of the investments being transferred were estimated at £374 million or 357p per share.

Aftar the schema becomes affective, and taking into account the investment currency premium realizable and estimates of the taxation charges and other axpenses which arise from implemending that proposals, tha net assets of Charter will be £305 million, or 291p per share. However for every four Charter shares now held Charter shareholders will receive one new Minorco share with pet asset value, based on market values at 10th October, 1979. of U.S. \$6.76 per shara (312p), or at their discretion U.S. \$4.65 in cash, equivalant to 236p in the hands of United Kingdom residents.

The earnings of Charter for the year to 31st March, 1979 were £23.0 million (21.9p per share) and for the half-year to 30th Saptember 1979 £14.4 million (13.7p per share). Details of Charter's performance for the six months to 30th Saptember 1979 will be found in the interim report issued today. Assuming that the schame had become effective at the beginning of the relevant periods then the pro forma earnings of Charter for the year to 31st March 1979 would have been £27.7 million (26.4p per share) and for the half-year to 30th September 1979 £13.9 million (13.3p per share).

The schama documant will set out the basis on which the pro forma earnings have been compiled and will show that, while the overall earnings of Charter will not be materially affected by the Schema, the amount of income from the various sources will be conaiderably altered, in particular investment income will be reduced with a corresponding increase in the share of retained earnings of associated companies. The directors of Charter intend, if the scheme is approved, to declare en interim dividend for the year to 31st March 1930 of 3p per ahate, together with a speciel dividend of 0.35p per share to be peid on of about 3rd January 1980. The special dividend should be regarded as derived from income already leceived by the company in the current finencial year from the investments to be transferred to Minorco under the proposals. If the proposals are epproved, and in the absance of unforesaen circumstances, the directors intend to recommend a final dividend of 5p per share, making total dividends including the special dividend of 8.35p per share for the year.

The directors of Minorco have stated that, assuming the Schema becomes effective, and in the ebsence of unforeseen circumstances, they intend to recommend a final dividend for the year ending 30th Juna 1980 of 16 cants per ahare on the enlarged capital which is cunantly equivalent to 1,73p before taxation for every Charter share held.

It is also proposed to seek tha consant of the holders of the Charter convertible unsscured loan stock to the early redamption of the loan stock at par.

Implementation of Scheme

The proposala summarised above will be effected in part by a Scheme of Arrangement under the Companies Act 1948 and separate meetings of holders of fully paid and pardy paid Charter shares end convertible loan stock will each have to approve the Scheme

Application is being mada to the High Court on 17th October to direct that the requishe meetings be held on 14th November 1979. On that basis, providing the Resolutions are duly passed and the Scheme sanctioned by the High Court, it is expected that the proposals will become effective on or about 4th Dacember 1979.

It is expected that dealings in Charter shares will recommence on 17th October 1979. The board of Charter has been advised by Hambros

Bank Limited and Morgan Grenfell & Co. Limited.

#### IMPERIAL CHEMICAL INDUSTRIES LIMITED ('ICI') CHARTER CONSOLIDATED LIMITED ('CHARTER') ANGLO AMERICAN CORPORATION OF SOUTH AFRICA LIMITED ('AAC')

### **CLEVELAND POTASH LIMITED**

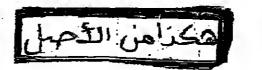

ICI, Charter and AAC have concluded an agreement whereby Charter and AAC have acquired ICI's 50% sharebolding in Cleveland Potash for a nominal consideration.

Under the agreement ICI. Chartes and AAC have provided Cleveland Potash with approximately £26 million in the original ehereholding ratios of 50:37.5 and 12.5 to enable it to repey all third perty loans for which they had given guerentees end other essurances. In eddition if it should become necessary to close the mine at any time up to 31 August 1981, ICI will make a contribution on a diminishing scale to the cost of closing the mine.

The existing potesh sales contract between Claveland Potesh and ICI will continue and the period of the contract has been extended,

The arrangements that have been made between Charter and AAC for the provision of funds to Cleveland Potash are the subject of 9 separate announcement issued today by Charter.

.

Importantly, the deal also relieves Charter of any further respoosibility for the struggling Cleveland Potash oparation in Yorksbire. It is to be kept going et least nntil cext February, by Anglo. Imperial Chemical Industries has pulled out of this partnership leaving Anglo and Cberter each with 50 par cent. Sharebolders in Charter are to be given new shares in Minorco on a deperform hasis Part or on a one-for-fonr basis. Part or all of these may be resold to Anglo and De Beers at a price of \$4.65 per share, equivalent to 236p in the bands of UK residents.

Charter also intends to declare charter also intends to declare an interim for the year to next March of 3p plus a special dividend of 0.35p. A finel dividend of 5p is enticipated making total dividends for the year of B.35p against B.625p for the year to last March. Earnings for the balf year to September 30 amount to £14.4m or 13.7p per ebere.

Of the major investment port-folio changes, Charter is to achieve a better balance Detweet receive from Anglo and De Beers mining and lodustrial income with the emphasis on the latter. receive from Anglo and De Betta e 28 per cent stake in platinum with the emphasis on the latter, refiners, Johnson Matthey — At the same time the group's refiners, will be described by Mr. Harry Oppen- cash resound heimer as "a major strategic strengthened.

Sergeant J\*n\*k\*n was hit on the head

25

After S years in the last war, after keeping the peace in Kenya, after seeing through the evacuation of Aden, Sergeunt Jon"kon was hit on the head. With a stone.

He lost his reason.

He has been with us ever since he was invalided home. Semetimes in hospital, sometimes in our Convalescent Home — wherever he is, we look after him. We provide work in a shehered industry, so that he can live without charity. One day, he'll probably enter our Veterans' Hence for good, still thinking that the next man in the street is about to attack him. Every year brings in more and more deserving cases like Sergean: J\*n\*k\*n.

And every year our costs go up. If we are to survive in '79 we must have more funds. We're doing everything we can, but in the end it depends upon what you can afford to give.

"They've given more than they could --please give as much as you can".

**MINERALS AND RESOURCES CORPORATION LIMITED ('MINORCO')** 

The board of Directors ennounce thet egreement has been reached between Minorco, Cherter Consolidated Limited (Cherter), Anglo American Corporation of South Africa Limited (AAC), and De Beers Consolidated Mines Limited (De Beers), whereby Minorco will acquire two substantiel investments with a total value of U.S. \$141.2 million; will enlarge its public shareholding; will be repaid the loans advanced to Zambia Copper Invactments Limited (ZCI) and released from or indemnified egeinst its obligations in relation to Botswana RST Limited (BRST) and BCL Limited (BCL).

These proposals will be described in detail in a circular to be posted to shareholders on or about 22nd October 1979. They are subject to the necessary consents of shareholders, and resolutions to approve the transactione will be put to a Special General Meeting to be held on 14th November 1979,

- The following is a summery of the proposals :
- (i) Minorco will ecquire from Cherter an interest of 1B.7% in the equity capital of Anglo American Corporation of Canada Limited (Amcan) valued et U.S. \$19.4 million. Minorco will also acquire from Charter one million ordinary shares representing a 10% interest in the equity capital of Anglo American Investment Trust Limited (Anamint) velued at U.S. \$89.5 million. In consideration for these acquisitions Minorco will issue direct to Charter shareholders 26.2 million new ordinary shares in Minorco on the basis of one new ordinery share in Minorco for every four Chener shares held. The balance of the consideration will be settled by U.S. \$12.9 million in cash payable by Cherter to Minorco.
- (ii) Minorco.will acquire from AAC and De Beers e further effective 31.3% Interest in Amcan, increasing its total investment in Amcan to S0%, for a cash consideration of U.S. \$32.3 million.
- De Beers will lend ZCI sufficient funds to enable ZCI to repay the loan edvanced by Minorco to enable ZCI to meet its commitments to BRST and BCL. De Beers will indemnify Minorco against certain financing obligations and contingent liabilities in respect of BRST and BCL, and will acquire ZCI's interest in BRST and BCL with the exception of the ordinary shereholding in BRST which ZCI

CHARTER CONSOLIDATED LTD ('CHARTER') MINERALS AND RESOURCES CORPORATION LTD ('MINORCO')\* ANGLO AMERICAN CORPORATION OF SOUTH AFRICA LTD ('AAC')† DE BEERS CONSOLIDATED MINES LTD ('DE BEERS')† ZAMBIA COPPER INVESTMENTS LTD ('ZCI')\* (together referred to as "the companies")

#### Introduction:

The boards of directors of the companies ennounce that subject to the approval of shareholders, end other necessary consents being received, egreement has been reached on certain proposals developed in consultation. between the companies. The eims of the proposals are :

- To enlarge the United Kingdom and European holdings of Cherter, which is based in London, and to achieve a better balance between its mining and Industriel investments, whilst strengthening cash resources available for its development.
- To enlerge the asset base of Minorco, e Bermu-2. dien mining and investment company, to widen Its public shareholding and to facilitate the development of its interests in North America end. elsewhere.
- To enable Charter shareholders to participate

Proposed consideration In respect of assets transferred to Minorco (a)

26.2 million new Minorco shates will be issued to Charter shareholders in the ratio of one new Minorco shere for every four Charter sheres. Sharaholders who do not wish to retain the new Minorco shares will be able to take advantage of the offer which will be made by AAC and De Beers to purchase for cash ell or part of their entitlement at the price of U.S. \$4.66 per share. AAC end De Beers intend in due course to place with institutional Investors some or ell of the ehares acquired . in this way, to widen the ownership of Minorco.

£5.9 million in cash to be transferred to Minorco by Cherter.

CLEVELAND POTASH LIMITED It has been announced that Cherter end AAC have acquired for nominal consideration the 50% interest of Imperial Chemical Industries Limited (ICI) in Cleveland Potash Limited (Cleveland), ICI, Charter end AAC

### iog the quarter and although despatches of copper concen-trates were slightly bigher, there was e marked fail in those of zinc. exacerbate the situation, To the latest quarter's figures bear the additional cost of R1.54m in treatment charges which should bave been accounted for in the June quarter. Furthermore, the producer price of zinc in the letest quarter was lowered to \$780 per tonne from \$845. The letest quarter's profits of

- directly in Minorco.
- To relieve Charter of the liability to fund opera-4. tions at Cleveland Potash but enable. it to participate in the cash flow if the mine can be brought to profitability.
- To effectively relieve Minorco of financing end 5. guarantee obligations in regard to Botswana RST Limited (BRST) and BCL Limited (BCL). BCL owns and operates a nickel/copper mine at Selebi-Phikwe in the Republic of Botswane and is hald as to B5% by BRST.
- To relieve ZCI of its obligations to Minorco in 6. respect of BRST end BCL.

SUMMARY OF THE PROPOSALS Separate announcements have been published today in connection with proposals relating to:

- (e) The restructuring of Charter,
- (b) Cleveland Potash Limited.
- The enlargement of Minorco, and (C) Minorco and ZCI'e contractual commitments to
- (d) BRST/BCL These announcements give a detailed outline of the

proposals as they affect each of the companies. An overell summary of the proposals, showing their interrelated effect on the groups involved, follows: CHARTER

- Proposed transfers of assets from Charter 1. to AAC and De Beers
- 13,226,500 shares in AAC, representing a 5.9% (a) interest, to be transferred to De Beers.
- (b) A 15% interest in the equity capital of Australien Anglo American Limited (AAA), which is the company through which AAC end its associates invest in Australia; and associated interests held by Charter in gold and base metal prospecting companies in Australia, to be transferred to De
- (c) issued quotas representing 15% of the base metal interests and 12% of the gold interests of Anglo American Corporation do Braeil Limitade (Ambras) to be transferred to De Baers. Ambras hee investments in gold, base metals, banking end the food industry in Brazil.
- (d) A 4.2% interest in Rustenburg Platinum Holdings Limited and a number of other minor investments in southern Africa to be transferred to AAC. Proposed transfers to Charter from AAC
- and De Beers
- A 28% interast in Johnson Matthey & Co. Limited, a United Kingdom company whose principal businesses ere in banking, the marketing and refining of precious metals and the manufacture of colours, pigmants and transfers. De Beers, in furtherance of the Schema, acquired on 12th October, 1979 the 23% interest in Johnson Matthey formerly held by Johannesburg Consolidated Investment Company Limited.
- (b) A 3.5% interest in Tera Exploration and Development Company Limited, bringing Charter's holding to 14.3%.
- A 15% holding in Société Minière d'Anglade, bringing Charter's holding to 40%.
- £46.6 million in cash.
- Proposed transfers from Charter to з.
- A 10% interest in Anglo American Investment Trust Limited (Anamint), whose main investment (a) is a substantial holding in Da Beers.
- (b) An 1B.7% interest in Anglo Americao Corporation of Canada Limited (Amcan), which is primarily en
- investment company whose principal asset is its 44.9 per cent holding in Hudson Bay Mining and Smelting Co. Limited - a diversified naturel resources group with major Interests in base metals, oil, gas and fertilizers. Hudbay; in partnership with Minorco, owns 100% of the equity interest of Inspiration Consolidated Copper Company and controls Trend Exploration Limited.

heve provided Cleveland with approximately £26 million (in their original shareholding ratios of 50: 37.5:12.5) to enable it to pay off ell third party loans for which they had given guarantees end other assurances

Charter end AAC have agreed to continue with operations at Cleveland end believe that the increased production in the first five months of 1979 and that improvements in the layout of the mine provide grounds for some optimism that the operation can be brought to profitability. However, it hee not yet proved possible to obtain a level of production above that achieved in April and it has been agreed therefore that performance should be reviewed in .February 1980. AAC and Charter will become equal partners in the project, but AAC has undertaken to provide ell funds required for operations up to Februery 1980.

As en integral part of the proposals being put to shareholders, and subject to the February raviaw, AAC has undertaken to provide such further funds as the mine requires, these funds and those subscribed to the and of Februery 1980 being recoverable with en ennual return of 25% as a first call on Cleveland's cash flow. Thereafter Charter will share equally with AAC in any cash flow from the project,

If et any time e decision should be taken to close the mine or suspend operations, Charter's funding obligations will be limited to e maximum of £4.5 million, being 371% (Charter's former shareholding interest) of the estimated costs if the mine had been closed now. MINORCO

In addition to the above transactions with Charter, Minorco will acquire from AAC end De Beers a further effective 31.3% interest in Amcan, bringing Minorco's total interest in Amcan to 50% for a cash consideration of U.S. \$32.3 million.

BRST/BCL

In conjunction with these proposals and subject to the necessary consents, De Beers will, as from 1st. July, 1979 effectively relieve Minorco of its obligations to BRST and BCL as indemnified by ZCI. The agreement between Minorco and ZCI dated 10th April, 1978 will be terminated. De Beers will lend ZCI sufficient funds to enable ZCI to repay in full its loan from Minorco, inclusive of accrued interest. This, payment will amount to the balance outstanding at 30th June, 1979 of U.S. \$5.243 million, less repayments of U.S. \$3.9 million since that date. De Beers will elso effectively assume the balance of ZCI's contractual commitments to provide finance to BRST/BCL with effect from 1st July 1979, end in eddition Da Beers will provide ZCI's portion of additional funds which shareholders may agree to provide, if BRST/BCL requires finance in excess of the contractual commitments before echieving a position cash flow.

In consideration for these errangements ZCI will: (a). Transfer to De Beers its holding of 19.7% of the preference shere capital of BCL, while retaining

- its 11.75% interest in the equity of BRST. (b) Cede to De Beers its interest in promissory notes representing loans to BRST and BCL end its
- interest in promissory notes issued by BCL in - respect of rovalties. Grant to De Beers a fixed charge over all of ZCI's
- (c) assets and those of its subsidiary companies, as . security for the obligation to refund to De Beers any contingent liabilities paid by Da Beers in regard to BRST and BCL.
- The loen advanced to ZCI by Da Beers will be repayable out of the general cash flow of ZCI and as part of these proposals it has been agreed that once BCL is in a position to service end repay finance provided by its major shereholders, the cash flow in respect of ZCI's present participation will be applied first in repaying all amounts advanced by De Beers after 1st July 1979 to BRST and BCL together, with interest at the rate of 25% per ennum. Such cash flow

will secondly be applied towards the discharge of the

a second to a second second second

shares will elso be more widely held Minorco elready has substantial interests in North America through its 29 per cent interest in Engelhard Minerals and Chemicals Corporation, its joint ownership with Hudson Bay Mining and Smelting Co. Limited of Inspiration Consolidated Copper Company, and its investment in

Trend Exploration Limited, its esset base will be substantielly increased by the acquisition of important interests in Canade .end thereby indirectly in the United States. Minorco will also acquire, through its holding in Anamint, a significant interest in the international diamond business,

Minorco will be repaid the loan to ZCI end in eddition, will be relieved of its contractual commitments to provide funds to ZCI which at 30th June 1979 were approximately U.S. \$8.9 million. It will elso be indemnified against its contingent liabilities in respect of guarantees of epproximetely U.S. \$1B4 million concerning BRST/BCL. Minorco has arranged a multicurrency loan facility of U.S. \$50 million from a consortium of major banks which will be used in part to finance the net cash consideration due from Minorco under the proposed errengements. The proposals will ellow Minorco's dividend to be significantly increased. It is enticipated that dividends totallin 19 cents a share will be declared for the financial year ending 30th June 1980, compared with 12 cents n share in each of the years 1977, 1978 and 1979.

AAC and De Beere and their chareholders While designed inter ells to enhance the intrinsic value of shareholders' investments in Minorco and Cherter, the proposale ere not expected to have e material effect in the short term on the earnings or net asset value of AAC or De Beers. AAC will retain its holding in Charter and will acquire new Minorco sheres. AAC and De Beers intend to rearrange their shareholdings in Minorco, Amcan, AAA and Ambras broadly in the ratio of 2 to 1. AAC and De Beers will participate in the long term advantages which are expected to flow from the establishmant of e more eppropriate structure for the future development of both Charter and Minorco as well as in the development of Amcan, Ambras end AAA. The obligations relating to Clavaland and BRST/ BCL undertaken by AAC and De Beers will . entitle them to reimbursement, out of any future cash flow from these undertakings, of emounts advanced by them, together with a return appropriate to the risks involved.

ZCI and its shereholders

З.

ZCI is relieved of its existing commitments and guarentee abligations in respect of BRST and BCL at a time when substantiel edditional finance is forecast to be required (in order to achieve a positive cash flow) which ZCI's financial resources are insufficient to meet and when Minorco, which has hitherto stood behind ZCL has other priorities for the investment of its resources. ZCI will, however, have an obligation to refund to De Beers eny contingent lieblities paid by De Beers with respect to BRST and BCL

Circulars describing the proposals in detail will be posted to the shareholders of Charter, Minorco and ZCI on or about 22nd October 1979.

It is expected that dealinge in the sheres of Charter. Minorco and ZCI will recommence oo 17th October 1979. .

The board of Charter has been advised by Hambros Bank Limited and Morgan Granfell & Co., Limited. The boards of Minorco end ZCI have been advised by

16th October 1979 Macorporated in Bermuda Tincorporated in South Africa

will retain. AAC will release Minorco from certain obligations undertaken by Minorco to AAC In respect of BRST and BCL As a result, the agreement between Minorco and ZCI dated 10th April 197B end referred to in the circular to shareholders dated 11th April 197B will be terminated.

Minorco has arranged a multi-currancy loan facility of U.S. \$50 million part of which will be used to finance the cash consideration due from Minorco to AAC and De Beers. The loan is for a period of ten years and is repayable in five equal instalments over the last four years.

#### EFFECT OF THE PROPOSALS ON MINORCO

These proposels form part of a broadau acheme fou an exchange of investment holdings between Charter, Minorco, AAC and De Beers, and if eccapted by shareholders would result in :

- (i) A major increase in Minorco's Nonh American interests through the acquisition of a 50% interest in the capital of Amean, whose principal asset is its holding of 44.9% in Hudson Bay Mining and Smelting Co. Limited (Hudbay). Hudbay has copper and zinc mining interests in Canada and holds inter alia 50% of the equity of Terra Chemicals Internationel Inc. which manufactures fenilizers end agricultural chemicals in the United States. Hudbay has a significant interest in oil and gas production through its 69.1% investment in Canadian Marrill Limited, its 54.9% investment in Francana Oil and Gas Limited. Hudbay, in partnership with Minorco, owns 100% of the equity interest of Inspiration Consolidated Copper Company and controls Trand Exploration Limited, which operates in Canada, the USA and indonesia.
- (ii) The ecquisition by Minorco of 10% of the ahere capital of Anamint, whose main investment is a substantial holding in Da Beers. This represents a significant holding in the international diamond industry.
- (iii) Minorco will be effectively relieved of its obligatione amounting to U.S. \$18.4 million in relation to guarantees and indemnities givan for eums borrowed by BRST/BCL and by the Republic of Botswana from third party lenders for financing the copper/nickel mine in Botswana. These guarantees and indemnities relete to ZCI's perticipation in BRST/BCL, and Minorco has been counter-indemnified by ZCI. Minorco has further undertaken to lend or procure for ZCI funds to enable ZCI to meet its contractual commitments to BRST/BCL for the future financing end expension programmes of the mine. At the 30th June, 1979 Minorco had lent U.S. \$5.24 million to ZCI in terms of this undertaking. While ZCI has repaid U.S. \$3.85 million from funds raleased from Zambia, it has been required, since 30th June 1979 to edvance a funher U.S. \$2.12 million to BRST and BCL. In consequence the balance of this loan, inclusive of accrued interest, amounted to U.S. \$3.51 million at 30th September 1979. De Beers will make available to ZCI loan finance at a commarcially related rate of interest to enable ZCI to repay this loan in full, together with accrued interest.
- (iv) In addition to the increase in the eize of the company, Minorco will elso have a wider spread of ehareholders.

EFFECT OF THE PROPOSALS ON SHAREHOLDERS

The mejor effects on shareholders of the edoption of the proposals (assuming they were effective throughout the financial year) are as follows:

- (i) an increase in the profit efter taxation of 1.8 U.S. cents perchare or 6.9 per cent;
- (ii) e decrease in net profit for the year of 14.2 U.S. cents par share or 14.4 pet cent. It should be noted that the decrease is wholly attributable to the corporation's share of earnings retained by associated companies:
- (iii) the net esset value per ahare of the existing issued cepital, taking no account of the proposals and based on the consolidated balance eheet as at 30th June, 1979, but with market values as at 10th October, 1979, amounts to U.S. \$7.52. After implementation of the proposals, the net esset value per shere on the enlarged shere capital calculated on the above basis, will be U.S. \$6.76, a dilution of U.S. \$0.75 per chare. This dilution should, however, be viewed in the light of the indemnification and ralease of the corporation in terms of the proposals from contingent liabilities and from contractual commisments to provide finance in respect of BRST and BCL which in aggregate at 30th June, 1979, amounted to U.S. \$27.24 million, equivalent to U.S. \$0.37 per share. The contractual commitments in themselves are unlikely to be sufficient to bring the project to a positive cash flow.

As a result of the material increase in investment income, combined with the release from the obligations to provide funds for ZCI in respect of BRST/BCL, the board intends, in the ebsence of unforeseen circumstances and on the basis of current estimates, to recommend that the dividend for the year to 30th June 1980 be increased to 19c per shere (1979 12c per share). An interim dividend of 4c per ahare will be declared on or about 14th November 1979 payable on 11th January, 1980 to shareholdere registered on 30th November 1979. The final dividend will be 15c per share on the aniarged capital.

Mr. H. F. Oppenheimer will become cheirman of the corporation and, upon Mr. W. D. Wilson's ratirement at the forthcoming annuel generel meeting Mr. H. R. Fraser, who as the chief executive officer hes taken up residence in Bermuda, will succeed him as president. It is proposed to reconstitute the board of Minorco when the proposale become effective to reflect its enlarged public ehereholding and the further development of its internetional business. The board will be sugmented by the appointment of a number of directors to make it more broadly respresentative of the corporation's areas of interest.

In addition to the approvel required by Minorco's shereholders to the resolutions to be proposed at the Special General Meeting these proposals are eleo contingent upon :

- (i) The necessary approvale being obtained to a Scheme of Arrangement between Charter and its chareholders and loen stockholders.
- (ii) The said Schama of Arrangement being sanctioned by the High Court in England and being registered with the Registrar of Companies.
- (iii) The Stock Exchange In London grenting e listing for the new ordinery shares to be issued in that corporadon

It is expected that dealings in Minorco's sheres will recommence on 17th October 1979. The board of Minorco has been edvised duting these negotiations by Lazard Brothers & Co., Limited.

16th October 1979

Lazard Brothers & Co., Limited.

Extraord. dsbits\* ..... Extraord. dsbits"...... 3.4 5.5 \* Exchange Jasses on translation of overcess nanets end liabilities (C3.7m in 1978 primarily represented trading lasses and closure costs of dperstiana disconlinued and clesad.) Profits of the National Enterprise Board dropped during the first helf of this year from £23.1m te £20.4m before taxstion and extraerdinery items were taken into account.

This was reported yesterday hy Sir Leslie Murphy, chairman, who said the drep was caused by the lorry drivers' strike last winter and the rising value of the pound hitting the activities of the heard's subsidiary and associate

neard's substituty and associate anean at 21.2m against 21.1m for the balf year to September 30, He added that the angineering 1979. An interim dividend ef workers' psy dispute had hit 1.2p has already been announ-the NEB's companies in recent ced. Stated earnings per 25p weeks which meant that he did share rose this time from 1.37p to not anticipste that the results 1,56p.

At September 30, net asset value was 105.15p (102.63p).

After deducting taxation and minerity interests, but befere extraerdinary items, the profit figure for the first half was 10.3m compared with £9.2m in the same peried last year. HIT BY a very sharp rise in preduction costs, Aberthaw and Bristei Channel Pertland Cement Company incurred a pre-tax loss of £217,000 in the first half of 1979, compared with a £522,000 profit for tha same period last year. treaty year.

Excluding the board's BL and Rells-Reyce subsidiaries, the prefit befere interest, taxstien and extrserdinary items was \$7.6m compared with \$8.7m for However, from July, high pro-duction and sales and an increase in cement prices aince August, have led to a considerable im-provement and the group is trading profitably.

This produced a return on capital empleyed of 8.5 per cent compared with 10.2 per cent for the period last year. The Gov-ernment's target for the NEB ia te resch 15 to 20 per cent by 1981, but this is now being re-duced te take account of the NEB's restricted activities under The rise in costs resulted from twe increases in gas prices and exceptional costs arising from the severe winter.

Fnel costs represent a large proportion of the group's total costs and the directors say it is at 9 disadvantage in having to pay much more for fuel in 1979 NEB's restricted activities under 479 1978 579 1978 571 2,032.7 54.6 47.9 43.2 55.5 43.9 55.5 2.7 72.2 nonths 1978 than other cement manufecturers

than other coment manufecturers whe use coal. Despite had weather, home trade deliveries were greater than in the corresponding peried ef 1978. The high demand level has continued and it is hoped that home trade deliveries in 1979 will ha appreciably more than last year. 47.9 55.5 55.5 4.3 59.8 36.7 23.1 11.0 12.1 2.9 9.2 3.7 5.5

than last year. Fellowing completion of the project to convert the Aberthaw kilns from gas to coal firing, ex-pected in early 1980, the direcpected in early 1980, the direc-tors say there will be a signifi-cant reduction in preduction costs. This, combined with the high fuel efficiency of the kilns, sbould enable the group te be in a strong position. The interim dividend is 2.9245p (2.79920) net —last year's final was 4.7465p.

(2.79920) net —last year's final was 4.7465p. Depreciation charge touk 5336,009 (£319,000) and interest was up from £148,000 to £230,000. Ne tax is payahle, against £242,000 last time. Northern Investment Trust was ahead at £1.2m against £1.1m for

# **B.** Bailey doubles dividend

Profit, after all charges, of Ben Bailey Construction advanced from £60,911 to 1543,463 in the year to June 30, 1979. Turnover was marginally higher at £5.23m, against £5.03m.

The profit includes tax of £209,610 (£55,996), and £358,170 deferred tax this time on stock appreciation relief no longer

Stated earnings jumped from L17p to 10.4p per 10p share. The net final dividend of 0.87p lifts the total to 1.2p. Last year there was a single paymant of 0.605p,

At midway, there was a turn-round from a £37,155 loss to a

**Further Progress** 

Salient points from the Statement to shareholders by Mrs J.M. Tyrrell

- Pre-tax profits increased by 50%, following the 85% increase in 1978.
- \* A dividend of 4p for the year is recommended (1978: 2.0985p).
- \* The heavy investment programme started in 1976 is now nearly complete. Over £6m has been spent on plant replacement and improvement - mostly funded from cash flow.
- \* Ratio of debt to shareho ders' funds reduced from 69% to 25%.
- \* Chenille yarns to be manufactured and introduced in 1979/80.
- ✤ High hopes of further records in 1980 -Sirdar's Centenary Year.

reopens

talks on

MASSEY-FERGUSON

By Jim Jones in Johannesbury

Massey SA

Federale Volksheleggings (FUB) have reopened negotia-tions on the sale of control of Massey-Ferguson (South Africa) to FVB.

In March last preliminary dis-

cussions between Messey-Fergu-

on, which bolds 51 per cent io

its South African offshoot, and

the other major sharebolder, FVB, which has a 31 per cent

stake ended unsuccessfully. At

that stage the Canadian parent reportedly turned down a 500

cents per sbare offer for part of the 51 per cent at R6.8m (U.S.\$5.2m). The Canadian parent is loth to invest further

funds in he South African operation in view of the group's

FVB. which is prepared to iovest further capital in Massey-Ferguson (SA) to help the

company attain local content requirements in its products.

Following termination of the earlier discussions Massey-Ferguson (SA) reported a first-

half operating loss of R600,000

for the six months to April 30. This compared with an operat-

ing profit of R520,000 in the

first half of the preceding year, and with a R833,000 total for

Shares in Massey-Ferguson

SA) were suspended on the

Johanneshurg Stock Exchange on Mooday, when they stood at

260 cents. But even though the

company has reported poor first-half resulta, most Johannesburg

analysts feel that FVB will buy

control from the Canadian parent at a price above the pre-

JAPANESE SUPERMARKETS

# Daiei leads in strong midway growth

#### BY YOKO SHIBATA IN TOKYO

JAPAN'S THREE leading number of shops handling St. supermarket chain operators— Michael items rose to 150, from supermarket chain operators-Daiei, Seiyu and Nichii-posted

strong sales and generally strong profits for the first half of the fiscal year to August, following the vigorous business performance reported by Jusco last week. Date, the nation's largest such company, lifted its operat-ing profits by 32 per cent to Y7.54bn (\$33.1m) and net profits by 30.5 per cent to Y3.80bn, on place of V498 Gebn (\$2.2hn), UD

sales of ¥499.68bn (\$2.2bn), up 9.4 per cent, as compared with the same period of the previous year. The sharp advance in earninga was attributed to its merchandising control, includ-ing the expansion of its own-brand items, which came to 21.4 per cent of the total merchan-dise mix. Daiej entered a tie-up

spending and further stream-lining efforta, Daiei has raised its earnings forecasts for the full fiscal year to put operating profits at Y18hn, up 19.5 per cent, and net profits at Y9bn, up 28.6 per cent, on sales of Y1,02bn, up 8.ā per cent. with Marks and Spencer in September last year and the

open four to five new stores in the currect half, following the 43 a year ago. The store aims to raise the sales of St. Michael goods to Y2bn in the curvent second half hy adding St. Michael foods from the end of this month. In Daiei's mcrchandise, St. Michael items are categorised as quality goods and are highly competitive, according to the

opening of four in the first half. A 10 per cent scrip issue is planned at the end of the fiscal year, in February. Seiyu, the second largest

supermarket chain, increased its operating profits by 8.7 per cent to Y3.34bn, and net profits by 0.6 per cent to Y1.80hn on company, During the six months, the store repayed Y12,3bn of borrowings, so cutting its interest payment burden. In view of strong consumer spending and further streamsales of Y255.13bn, up 11 per cent. Servu's relatively slow rate of opening new shops ttwo) during the period coincided with sluggish sales at the existing stores (up only 1.3 per cent).

In the second half, Seiyn expects to strengtheo sales and earnings by exerting a fullyfielded system uf merchandis- 22 per cent, and net profits ing control. Operating profits Y7bn, up 22 per cent on sal for the full year are expected of Y400bn, up 14.4 per cent.

The company is planning to open four to five new stores in the curreot half, following the opening of four in the first half. A 10 per cent scrip issue is four the previous year, net profits Y4hn, up 17 per cent on sales Y530bn, up 10 per cent. The group is planning to open four new slores in the current half. A further 10 per cent scrip issue at the end of next February is likely, according to the company.

Nichii posted Operating profits of Y4.94bn, up 16 per cent on sales of Y185.2m, up 10.7 per ecnt. Y86bn worth uf heavy investment for revamping ita Tokyo head strice, its net prolits dropped by 7.5 per cent over a year ago to Y2.52bn.

In the full year ending next February, Nichil expects operat-ing profits of Y12.5bn, up per cent, and net profits of 12 per cent, and net prostal Wibn, up 22 per cent on sales

### HOW TO AVOID COSTLY ANTI-TRUST LITIGATION

# SPOW Attractions and dangers of making a U.S. acquisition

IN THE first quarter of 1979, to cause the prohibited impair- Trade Commission (FTC) com- which sell the same product in facturer of his raw materials or Congress would bar substantial competition by the acquiring • Alternatively, will the creation of jointly-owned U.S. companies were acquired ment of competition than one plaint Brasean, a Canadian con- the same markets. 63 U.S. companies were acquired ment of competition than one by foreign concerns-a 70 per cent jump over the same period of 1978. In that year European acquisitions in the U.S. reached a record 358, confirming the reversal of the earlier flow of U.S. investments into Europe.

The sharp dollar decline bas made investment in the U.S. a prize bargain. But there are other, less also transient advantages, such as the rela-tively stable U.S. labour relations, and the possibility of turning a U.S. operation into an effective base for developing new markets in Latin America and around the world. However, these opportunities can be safely exploited only after careful assessment of antitrust risks.

The principal U.S. antitrust by which new technologies laws applicable to such acquisi-tions by European companies sources of capital introduced." and joint ventures in the U.S., prohibit transactions that cause unreasonable restraints of trade or substantial lessening of competition. The laws are enforced by the Department of Justice and by the Federal Trade Commission. They also provide a private right of action, so that any " injured " private party can file suit to stop the transaction or to collect treble damages and legal fees.

But the U.S. antitrust laws tories; and BASF/Wyandotte. contain a central paradox which favours foreign investors. Typically, an acquiring European firm

by an American firm. Thus, Atlantic-Richfield the U.S. Atlantic-Richfield the petro-giant could not, but Britisb Petroleum could, acquire Sinclair Oil's assets. Likewise, West Germany's Tengelmann Group evidently can, but Safeway clearly could not, buy America's Great A & P Tea Company.

In bostile U.S. take-over situations, the European firm may become the ideal "white become the ideal "white knight" coming to the rescue of a choice acquisition target. Indeed, Mr. J. Shenefield, the ing factors:--chief U.S. antitrust enforcement official recently declared: "As of now, foreign purchases of U.S. businesses are as likely as not to be pro-competitive, to

be invigorating, to be avenues tices, and environment of affected industries;

#### Acquisitions

Understandably, therefore, of bundreds of foreign acquisitions in the U.S., only a few have faced antitrust attack. Successful multi-million-dollar Euro-acquisitions in the U.S. in recent years bave included the following combinations: Thyssen/ Bndd; Unilever Ltd./National Starch; Bayer/Miles Laboraperceived.

Conversely, among the promi-nent failures bave been last year's abortive acquisition by careful strategic

or contingent spin-offs whereby the acquiring firm would seli off those of its operations which compete with the acquired firm.

Long-range

It is also advisable that, rather than nibbling at small acquisitions, each of which risks, the European investor should develop a long-range investment programme within which individual acquisitions are planned as part of a total strategy.

There are three basic antitrust tests of the legality of antitrust laws and enforcement Euro-U.S. joiot ventures in the arc strict, they basically lavour

poration C limit or diminish substantial existing or potential competition between Euro-parent A and U.S. parent B? . In practice, the gravest antitrust risks arise from joint distribution or sales ventures between European and U.S. pro-

duct competitors. At the safest legal extreme may be the joint creation of new U.S. corporation C to develop Euro-parent A's new product in a new market which it has no capability to enter alone-particularly if new corporation C creates new competitive stimulus within a lethargic established industry.

tion of jointly-owned U.S. cor-

Quite recently, the Justice Department disapproved a joint venture between Hitacht and General Electric, which cantern plated a jointly owned U.S. subsidiary. The Department did not consider the joint venture necessary for the viability of either parent in the U.S. televisinn market. Also, Hitachi had once hail the intentinn, capability and incentive for expanding TV sales in the U.S. on its own.

The U.S. antitrust scene is wide and varied but it can be said that, in general, while U.S. are strict, they basically layour Euro-acquisitions. But this advantage can be obtained only by those who are aware of the dangers. The penalty for antitrust neglect can be extremely costly litigation.

\* Mr. Rowe is senior partner of the U.S. law firm of Kirkland and Ellis.

# Air Transport inthe **Developing World**

### CINGAPORE-NOVEMBER 20 & 21 1979

Air Transport is increasingly recognised as a major tool of economic growth throughout countries of the developing world. The expansion of both passenger and cargo traffic through the 1980's is likely to become one of the biggest areas of investment.

The Financial Times is arranging an aviation Conference devoted to Air Transport in the Developing World at the Shangri-La Hotel, Singapore on November 20 & 21.

A distinguished international panel of speakers will help to

identify and suggest solutions to the problems this expansion may cause ---

- \* in purchasing new fleets of aircraft
- \* building new airports
- \* creating the complex infrastructure that civil aviation and the customer requires.

For full details of the agenda and registration procedures, complete and return the coupon below.

### A FINANCIAL TIMES CONFERENCE

Financial Times Wednesday October 17 1979 Thomson-Brandt strategy for

# **European TV-set survival**

#### BY DAVID WHITE

THE FRENCH Thomson group makes, among a lot of other things, colour TV sets. It also makes the most important components, the tubes, in collabora-tion with RCA of the U.S.

tion with RCA of the U.S. It intends still to be produc-ing them in the 1980s, without making concessions to the Japanese who already dominate the world market. In a few years time, as Thomson sees it, there may well be only itself and Philips in Europe to bold the bridge. Thomson's gambit is backed. up by the French Government's

up by the French Government's determination to assert French independence in certain hightechnology areas — electronics being among the top prioritles. At company and industrial policy levels, the French approach makes an interesting contrast with the UK.

The next few years are going to be crucial. The colour TV business is still subject to rapid technological change and is becoming increasingly competi-tive as opportunities for growth are narrowed down. Japan is already close to the stage where it will have more than one colour TV per family. The West

German market bas also been difficult since the end of last year. France, where just a third of bomes have colour TV, is one

of the remaining places where sales are still rising. Italy and Spain are others. Thomson bas a third of the French market, just behind its Dutch rival.

Audio victory With its Madrid TV factory and its West German acquisition Nordmende, it produces 1m finished sets a year, a tenth of the European market. This is not enough on its own to hold the off the Japanese threat, which

has already materialised in the UK and Italy and is beginning to do so in Germany. The French, like many others, bave already had to concede a Japanese victory in andio equip-ment. Can the same be avoided

in TV technology? A few weeks ago Thomson-Brandt, the group parent company, announced plans to pool its colour tube activities with those of West Germany's financially-troubled AEG-Telefunken. The agreement is due to take effect at the end of the year as long  $a_s$  the Federal Cartel Office is willing. It is a complicated balancing act in which RCA keeps its bridgehead in Europe, AEG keeps it stake in the field and Thomson keeps the upper hand.

Under the deal, the present Thomson-RCA joint venture Vidéocolor will take over the German group's plant at Ulm, making a third base after Lyon the and Anagni, near Rome. The company will, instead of being directly controlled by Thomson, be 58 per cent held by a joint Thomson-AEG venture. In this the French hold the 51 per cent barrier will soon be broken down. Production of integrated majority. RCA is keeping 42 per cent of Vidéocolor and is throwing in \$7m for good luck. sets from one system to the other, just by being slotted in, Vidéocolor is due to produce about 1.5m tubes this year-5 French experts. A small com-ponent will be the only difper cent of the world market-aod sell another 500,000 of RCA's. The agreement will RCA's. The agreement will bring total 1979 output up to 2.4m tubes and sales up to up to a Maginot Line.

FFr Labn or \$370m. latest in a series of moves since The agreement is only one of the beginning of the 1970s to a number of manoeuvres going on in the industry. It follows closely on Philips' shareholding in Grundig, intended as the basis for industrial collaboramake an international consumer products operation in what bad been essentially a French-based group. The name Thomson, incidentally, is mistion hetween the two it precedes any clear indication of what is leading. The company started as a licensee of a U.S. concern happeniog to a third major figure, ITT. long since eaten up by General Electric. The "Brandt" comes

This Thomsonsummer. from the merger of Thomson-Houston with the equally French arms and appliances Brandt was in line to take a controlling interest in ITT's axtensive consumer appliances company Hotchkiss-Brandt. division in Europe, which has been in a bad way. The French Government made it discreetly In 1970 the group got out of electrical power engineering by selling CGE its stake in Alstbom (a name which still clear that it would like at least to see ITT-Oceanic, one of the bears a remnant of "Thomson"). It then bought up some General Electric in-U.S. group's four European subsidiaries making television sets, pass into local French bands. terests in Spaln, which gave it 15 per cent of the Spanisb

But a palace revolution at ITT in July, when Mr. Lyman Hamilton was ousted as chief colour TV market. It set up a television factory in Singa-pore, employing 1,200 people. executive, put paid to all that. Two years ago it bought control The new powers at ITT were not letting the empire fall apart, of Nordmende and has since been paying beavily to restrucand said they would take all ture its German arm. necessary steps to strengthen European consumer division.

pany in consumer electrical pro-ducts, marketing under a variety of names, Thomson relies on More recent reports bave it that ITT plans to start making wide 68cm screens in Europe being big enough to carry the for Sony. After Thomson's success in getting in with AEG before Hitachi did, this prospect out of a total group workforce of 140,000 and had sales of FFr 7bn (\$1.7bn) last year. has once again set the cat among the European pigeons. In colour tubes, Vidéocolor,

All that bas happened so far which aims to step up produc-tion to 3m units in 1981, will not is only shadow-boxing compared with what it will be like only be number two in Europe; from next year. From the start of 1980, West Germany's PAL it may be one of the only two to resist one form or another colour television licence begins of Japanese encroachment which leads to the question: will it be war between the Euroto fall into the public domain. All the main and secondary patents run out between next peans or will there be a Euroyear and 1984, and with them pean front? the agreements which limit Looking at Thomson and exports of licensed equipment Philips, on the ground there is to Europe. every evidence of fierce com-

France is sheltered from this by virtue of its separate Secam

system (in which a member of licensee of Phillps; the license the Thomson group, Thomson-CSF, is a shareholder). But it of the year. It has now been of the year. It has now been brought into Thomson's orbit. Videocolor, which already sup-plied tubes to Blaupunkt, will is hardly secure. For a start, countries which have chosen the Socam system do not make much of a market for French exports. now also supply them for Telefunken TVs.

In addition, the technical In France, Philips competes directly. A subsidiary, Radlo-technique, produces 1m tubes a year, the bulk of them for export. Pbilips' advanced 30-AN tube rivals the Precision Incircuits capable of converting Linc (PILI tube being produced by Vldéocolor, a company which is not far off, according to although borrowing from RCA fcrence, and that hardly adds also develops its own products.

The confrontation can equally be seen in a growing-that is to Thomson's tube agreement say, not yet saturated—market like Spain's, where Thomson, Telefunken, Phillps and Grundig with AEG-Tclefunken is the are all present as colour TV manufacturers.

#### New spirit

But people at Thomson are hopeful about the devalopment of a "European spirit," begin-ning to form around the European Association of Consumer Electronic Manufacturers. This body was set up only six months ago, and has as its head M. Jacques Fayard. Thomson's senior director for the division.

The French see this organisation as helping manufacturers defend their market, stopping the Japanese from establishing "game preserves" and unifying the European market by bringing prices and norms into line. the

" The Japanese," argument goes, "have always been experts in small screens, We accept that. Our strength is in big screens. We don't want them exporting big screens to Europe. If the big manufacturers can't agree, By far the biggest French commaybe governments can. If there's no gentlemen's agree-ment with the Japanese, we have to show them it's not in

cost. The division employs 28,000 their interest." There is a great sense of urgency now, both in negotiations throughout the sector, and on an industrial level where errors have to be corrected: notably over-investment and failure to carry out necessary restructuring.

The Japanese have the technical lead and still have a conviderable cost advantage. At Vidéocolor, for instance, it is reckoned that even with all the transport and other charges, Japanese tubes are significantly cheaper. The question is whether the Europeans can petition. AEG-Tclefunken's tube create the conditions which will factory was until now a enable them to catch up.

"In food, as in everything, Trusthouse Forte demands the highest possible standards. When people take excellence for granted they're paying us he greatest compliment."

John Denney, Group Quality Assurance Executive

Like many of the staff at THF, John Denney is very much a back-room boy, rarely meeting the thousands of customers whose

interests he serves. In the Trusthouse Forte test kitchens and laboratories, he and his team of food technologists and quality control experts painstakingly probe and research

into every aspect of food and its. preparation. So thorough is the testing, that

where no standards are set by law, John Denney imposes them himself - and they are very exacting. To thrive on demanding work,

knowing that perfection is the required standard, calls for skill, application and the finest possible

training; it calls also for the supporting expertise of thousand of people behind the scenes, from food chemists to computer programmers and from expert ouvers to architects and engineers

Out of sight, and often out of mind - these are just a few of the vital people behind that certain THF smile.

TRUSTHOUSE FORTE

Financial Times Wednesday October 17 1979 THE UNITED ARAB EMIRATES MOVE TOWARDS BETTER COORDINATED POLICIES

**Critical time for Sheikh Rashid** 

BY DAVID SAXBY, RECENTLY IN THE UAE

A NEW mood of optimism pervades official circles in the United Arab Emirates following the formation of a new Government at the end of June under Sheikh Rashid, the Federal Vice-President and ruler of Duhai. The optimism stems chiefly from the fact that the Administration is now beaded by a vigorous, no-nonsense man of action.

( **\** 

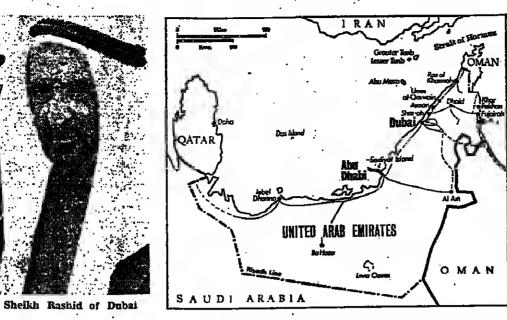

Sheikh Rashid's rivalry with Sbeikh Zayed, the President of the UAE and ruler of Abu Dhabi, the other main centre in the seven-state federation, is now a by-word. Until now the development of a tightly-knit federation with a unified national purpose bas been hamstrung by the determination of each men to pursue his own separate course within his own borders.

As other and poorer sheikhs among the seven rulers in the among the seven rulers in the UAE have competed for pres-tige stakes, the federation of about 900.000 people has acquired four international airports, with more to come, and deep-water port facilities fon an even grander scale.

The federation's previous Prime Minister Sbeikh Maktoum bin Rashid, son of the ruler of Dubai, was unwilling and unable to assert his authority to control the divergent ambitions of the Federal President and his own father in Dubai.

T Now the optimists helieve there is a real chance that the federation will be held to a steadier course because a real driver will be at the wbeeland a man whom many consider a prime cause of disunity in the UAE Moreover the external pressures brought about by the fall of the Shah provide an incentive for firmer and better co-ordinated policies. other countries. Already Sheikh Rashid bas

**COMPANY NOTICES** 

shaken the federal civil service by calling for an immediate start 10 work on the budget for the next financial year. And a sign of improved relations between the two main Emirates is that Abu Dhabi says it is pre-pared to supply much needed gas to Dubai's aluminium wealth which has seen a modern state mushrooming out of the desert has been dented severely by colder economic winds which bave followed

One of the most pressing questions with which Sbeikh Rashid will have 10 deal is that of security. As part of the pro-Dubai's dry-dock, built at a cost of £230m and known to sceptical citizens as the white elephant, was opened by Queen Elizabeth early this year, it is longed negotiations which led to bis hecoming Prime Minister, be bas agreed 10 integrate fully still not operating.

Although there seems to be no besitation about carrying on with the development of the industrial centre of Jebel Ali, his defence force with the federation's army, navy and air force of 30,000 men. The UAE bas so far been less affected than Babrain and Kuwait by the shock waves the new lown, and a 66-berth port, 20 miles from Dubai, one senior official close to Sheikh Rasbid recently expressed the emanating from Iran, partly because its population bas fewer Sbiite Moslems than the doubts which must pass through the minds of many of his countrymen.

Domestically there is no

#### doubt that Sheikh Rashid is development for and what will taking over the direction of the federation's affairs at a critical happen when the oil runs oul? Back to the desert in 20 years time. The ebullient confidence of the first decade or so of oil -- that's my personal view, be said.

The most awe-inspiring fact in support of his contention is that the country is year-by-year drawing off more water from its limited resources than nature can replace, desplte supplementation by desalinated sea water. At Al Dhaid in Sharjah the water table is falling by three feet a year and the Al Ain oasis will soon be receiving desali-nated supplies from Ahu Dbabi

instead of supplying the capital with water as in the past. ndustrial centre of Jebel Ali, he new 10wn, and a 66-berth port, 20 miles from Dubai, one enior official close to Sheikh asbid recently expressed the bouhts which must pass through he minds of many of his "What do we want all this

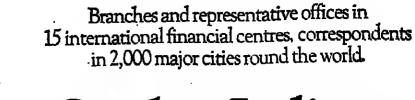

their hills," they sneer in Dubai. However, since Abu Dhabi's oil reserves are thought to be good for half a century at least, the Dubai official's pessimism. the Dubai unicities pessinismi, hased perhaps on his own sheikhdom's nucli smaller resources might well be exces-sive. Nevertheless it indicates growing awareness of the high social and environmental cost which the U.V.F. is having to pay for its sudden leap into the modern world.

besticiolica

There is deep resentment of the fact that less than a quarter of the population of the federation is native-bern and the large trading, labouring and junior executive community from the Indian sub-continent could well find itself victim of a racist backlash.

Pernaps the key social decision which cannot be put off much longer is whether to treat the non-European immigrant communities as part of the raw material from which the new state must be built rather than as a strictly migrant force which will one day go away.

As It is, the new town accom panyiog the Jebel Ali complex could be an entirely alien city. Time will tell whether Sheikh Rashid has the wisdom and statesmanship to mould the UAE into a real federation rather than seven small states each going its own way. The optimists insist that he will. Other observers point to the fact that Dubai and Abu Dbabi were at war over the horder between them as late as 1948 and that a border dispute between Dubai and Sharjah remains unresolved to this day.

**UK MONEY MARKET** 

Bank of England Minimom Lending Rate 14 per cent (since June 12, 1979)

Day-to-day credit was in good supply in the Londoo money

market yesterday, and the authorities belped to mop up soma of the surplus by selling a small amount of Treasury bills,

all direct to the discount bouses

However, after paying up to 134 per cent for secured call loans at the start, discount bouses picked up late balgnces as low as 9 per cent.

### INTERNATIONAL MONEY MARKET U.S. rates firm

U.S. interest rates continued to harden yesterday, and yields on Treasury bills advanced from the suction. Thirteen-week hills rose to 11.90 per cent from 11.836 per cent at the spction, and 26 week cent at the spction, and 26-week bills were firmer at 11.74 per cent the money market were easy with call money at 9 per cent and overnight business dealt at 64 ner cent.

bills were firmer at 11.74 per cent against 11.716 per cent. Nervous conditions prevailed in the wake of the Fed's shift in emphasis away from regulating tha Fed funds rate. In early trading yesterday Fed fonds were trad-ing 13<u>1</u>.13<u>1</u> per cent compared with Monday's closing level of 13<u>4</u> per cent. FRANKFURT — Call mopey continued to firm and tonched 9.40.850 per cent vesterday com-

9.40-8.50 ner cent yesterday com-nared with 8.30-8.50 per cent op Monday, Longer term rates were stable with one-month at 8.10.8.20 per cent, three-month at 8.50.8.60 per cent, six-month 9.20.8.30 per cent and 12-month 8.15-8.25 per

PARIS-Call mooey remained at 111 per cent yesterday, but loneer term rates showed a slightly easier tendency. Onemooth money was quoted at 111-112 per cent compared with 112-12 per cent, while three, six and 12-month money eased to 12-12} per cent from the previous com-mon level of 121-121 per cent. AMSTERDAM\_Interest rates were easier in the short term with call money at 92-93 per cent

commared with 91-10 per cent on Monday, and one-month money slipping to 97-103 per cent from

The market was belped by a small excess of Government disbursements ovėr revenue transfers to the Exchequer and banks bringing forward balances a moderate way above target. On the other hand there was the repayment of Monday's small market advances and a small net take up of Treasury bills to finance

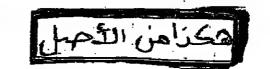

cast of a small shortage to 133-131 per cent. However, retes soon fell away and were down to 10 per cent by lupch. Some money was taken later in the day up to 13] per cent, but today promises to be somewhat easier, as banks will be eager to offer money to the discouot houses, since today is published figure day, and money lent to discount bouses counts as a reserve asset.

In the interbank market over-night loans opened at 131-131 per Rates in the table below are cent and rose on the early fore- nominal in some cases.

### CONTRACTS AND TENDERS

Limited from that date.

Summary

in the decade 1969-79 has made us one of the largest insurance companies in Holland in terms of gross receipts. The results for 1979 show a satisfactory consistency. Our present rate of growth justifies guarded optimism for the future.

were, at dfl. 1,163m, an increase of 7.6% on the same period of 1978.

Total profit after tax rose to dfl. 29.2m an increase of 32% on last year even after deducting 5.5% increase in

catastrophe reserve which was established this year.

5m provision were up by 24% to dfl. 11.58m -after correction for the anniversary bonus of 10% in shares paid in June this year.

#### Life Assurance

This sector provides the major part of the Group's income. Increased profits are partly due to continuing high capital market rates of interest, giving attractive returns on new investment.

The total value of Exports from the UK, including shipments to overseas subsidiaries, was £21,618,000 (last year £21,153,000).

\*adjusted to take account of the actual rate of taxation on the year's profit.

#### STATEMENT BY THE CHAIRMAN The Hon. Sir Marcus Sieff, O.B.E., B.A.

Our store sales in the UK showed good increases during the first quarter of the current financial year. The substantially increased rate of VAT, higher prices, and unseasonable summer weather led to disappointing sales in the second quarter. In cooperation with our suppliers we recently implemented a major antiinflation drive by lowering prices or curtailing price increases on a wide range of St Michael merchandise. This action has increased sales and helped our suppliers maintain good levels of production.

We expect good increases in sales and profits during the second six months.

On July 1st we awarded salary increases to our staff three months earlier than the comparative increases last year, with the aim of implementing future salary reviews earlier in the year. As a result the first six months' costs include an additional quarter's salary increases compared with last year.

European results are encouraging and we are negotiating several sites for new stores. The first phase of our new Dublin store will open in November.

Canadian results are better, although sales in the Marks & Spencer Division are still unsatisfactory. There have been no extraordinary costs in bear this year, against £1,118,000 during the first six months last year. Depreciation rates have been reviewed, increasing the charge for the six . months by £223,000 in comparision with last year.

The Directors have declared an interim dividend of 1.5 pence per share compared with 1.15 pence-per share last year, an increase of 30.4%. The interim dividend will be paid on 11th January 1980 to shareholders whose names are on the Register of Members at the close of business on 9th

November 1979.
